However its phenomena like earthquakes, tsunamis, volcanic eruptions and lightning had been objects of fear, curiosity and speculation since ancient times. In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488. This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country's proud history. The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa. **1924 Atlas of the World and Gazetteer** Funk & Wagnalls Company, 1924 **1923 Atlas of the World and Gazetteer** Funk and Wagnalls, Funk & Wagnalls Company, 1923 The Universal Atlas of the World C.S. A vital volume at a critical moment. Dr Augustus Casely Hayford, Director Africa 05. This book dispels the myth of a uniformly hopeless, hungry continent. It shows just how extraordinarily diverse Africa is and how much it has changed in the last 20 years. Full of fresh thinking on problems that face Africa and new African approaches to development. Richard Dowden, Director Royal African Society. This ground-breaking book, with a foreword by former President of Ireland, 1997 and UN Human Rights Commissioner, 1997-2002. Mary Robinson uniquely distils the complex issues surrounding Africa at the beginning of the 21st century. African and Western scholars provide a fascinating map for the reader to navigate between issues such as urban and rural livelihoods, the potential of fresh water, fishing, health, the HIV/AIDS crisis, conflict and efforts at peacemaking. Also included are critical assessments of Africa's role in the global economy, the growth of regional economic cooperation within Africa, the influence of ethnicity on the continent's politics, the evolution of its political institutions and the impact of Africa's legal systems on its development. A substantial introductory essay by the editors measures the distance Africa has travelled and the lessons it has learned since Africa in Crisis. The classic Earthscan book was published in 1985.
