Psychological Assessment in South Africa Sumaya Laher, Kate Cockcroft, 2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. *Psychological Assessment in South Africa* provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists, psychometrists, remedial teachers and human resource practitioners.

[Early Psychological Research Contributions from Women of Color, Volume 2](#) Rihana Shiri Mason, Jon E. Grahe, Michelle L. Ceynar, 2024-07-29 This volume serves as a companion to *Early Psychological Research Contributions from Women of Color Volume I*. It focuses on the dissertations of 20 builders, women of color who earned their doctoral degrees in psychology prior to 1990 and who were leaders in the field through their leadership or innovation. An introductory chapter bridges the two volumes. Each subsequent chapter summarizes and examines a dissertation using a consistent format including a biographical sketch of the builder with an emphasis on her significant contribution to an organization or innovation that moved the field forward, a summary of the dissertation, a reproducibility critique of the dissertation, and an alternative framework section that analyzes the dissertation from a modern theoretical perspective or methodological approach, e.g., feminist theory, liberation psychology, mestiza consciousness, etc. The topics cover the breadth of the discipline of psychology, including physiological, cognitive, developmental, social, and clinical. Some topics are also relevant to business, education, medicine, and social work. The varying nature of these dissertations allows the book to be used to augment coursework either

as a complete collection or as individual chapters This volume is intended for both instructors and students The course activities provide examples of how to integrate key aspects of the dissertation research into the classroom The volume was written with upper level undergraduate students in mind so that it could be used across the psychology curriculum but the editors envision this book as a potential graduate level text as well **Encyclopedia of African American History, 1896 to the Present** Paul Finkelman,2009 Alphabetically arranged entries from A to C that explores significant events major persons organizations and political and social movements in African American history from 1896 to the twenty first century
