Southern Strategies Elna C. Green, 2000-11-09 The biographies of more than 800 women form the basis for Elna Green's study of the suffrage and the antisuffrage movements in the South. Green's comprehensive analysis highlights the effects that factors such as class, background, marital status, educational level, and attitudes about race and gender roles had in inspiring the region's women to work in favor of or in opposition to their own enfranchisement. Green sketches the ranks of both movements, which included women and men, black and white, and identifies the ways in which issues of class, race, and gender determined the composition of each side. Coming from a wide array of beliefs and backgrounds, Green argues, southern women approached enfranchisement with an equally varied set of strategies and ideologies. Each camp defined and redefined itself in opposition to the other. But neither was entirely homogeneous; issues such as states' rights and the enfranchisement of black women were so divisive as to give rise to competing organizations within each group. By focusing on the grassroots constituency of each side, Green provides insight into the whole of the

Cavaliers and Economists Katharine A. Burnett, 2019-05-15 Offering a compelling intervention in studies of antebellum writing Katharine A Burnett's *Cavaliers and Economists: Global Capitalism and the Development of Southern Literature 1820-1860* examines how popular modes of literary production in the South emerged in tandem with the region's economic modernization In a series of deeply historicized readings Burnett positions southern literary form and genre as existing in dialogue with the plantation economy's evolving position in the transatlantic market before the Civil War The antebellum southern economy comprised part of a global network of international commerce driven by a version of laissez faire liberal capitalism that championed unrestricted trade and individual freedom to pursue profit Yet the economy of the U S South consisted of large scale plantations that used slave labor to cultivate staple crops including cotton Each individual plantation functioned as a racially and socially repressive community a space that seemingly stood apart from the international economic networks that fueled southern capitalism For writers from the South fiction became a way to imagine the region as socially and culturally progressive while still retaining hallmarks of traditional southern culture namely plantation slavery in the context of a rapidly changing global economy Burnett excavates an elaborate network of transatlantic literary exchange operating concurrently with the region's economic expansion in which southern writers adopted popular British genres such as the historical romance and the seduction novel as models for their own representations of the U S South Each chapter focuses on a different genre pairing largely under studied southern texts with well known British works Ranging from the humorous sketch to the imperial adventure tale and the social problem novel *Cavaliers and Economists* reveals how southern writers like Augusta Jane Evans Johnson Jones Hooper Maria McIntosh William Gilmore Simms and George Tucker reworked
