Supranationalism in the New World Order Paul Close,Emiko Ohki-Close,1999-03-25 Supranationalism in the New World Order argues that in the post Cold War distribution of global power and configuration of global players the European Union is just one among a growing number of regional regimes that are acquiring prominent roles in the process of global governance to some extent through the operation of differentiated zones of geo political management The EU is currently the most advanced and influential example of a regional regime by virtue of having the novel European Community at its core the EC uniquely being constructed around supranational institutions decision making and laws But the EU s uniqueness is unlikely to last The evident competitive advantages of supranational regional regimes in conjunction with the realism generally adopted by the various global players is conducive to the consolidation and proliferation of SRRs in a manner consistent with the neo functionalist perspective on the progress of the EU Other prospective SRRs include the Association of Southeast Asian Nations the East Asian Economic Caucus the South Asian Society for Regional Cooperation the North

American Free Trade Area and the Andean Community It is argued that the emerging character of the global system will increasingly depend on SRRs the relationships among such organizations and accordingly the doctrine of supranationalism The book offers a distinctive way of representing the global system global processes and global developments with the help of a set of freshly articulated concepts The result is a novel but highly contentious treatise **The New Great Game**

Thomas Fingar,2016-03-23 China's rise has elicited envy admiration and fear among its neighbors Although much has been written about this previous coverage portrays events as determined almost entirely by Beijing Such accounts minimize or ignore the other side of the equation namely what individuals corporate actors and governments in other countries do to attract shape exploit or deflect Chinese involvement The New Great Game analyzes and explains how Chinese policies and priorities interact with the goals and actions of other countries in the region To explore the reciprocal nature of relations between China and countries in South and Central Asia The New Great Game employs numerous policy relevant lenses geography culture history resource endowments and levels of development This volume seeks to discover what has happened during the three decades of China's rise and why it happened as it did with the goal of deeper understanding of Chinese and other national priorities and policies and of discerning patterns among countries and issues **All Under Heaven** Tingyang Zhao,2021-06-29 In this succinct yet ample work Zhao Tingyang as one of China's most distinguished and respected intellectuals provides a profoundly original philosophical interpretation of China's story Over the past few decades the question where did China come from has absorbed the thoughts of many of China's best historians Zhao keenly aware of the persistent and pernicious asymmetry in the prevailing way scholars have gone about theorizing China according to Western concepts and categories has tasked both Chinese and Western scholars alike to rethink China To this end Zhao introduces what he terms a distinctively Chinese centripetal whirlpool model of world order to interpret the historical progression of China's All Under Heaven Tianxia identity construction on the central plain of China In this book Zhao forwards a novel and compelling thesis on not only how we should understand China but also until recently how China has understood itself
