Sovereigns, Quasi Sovereigns, and Africans Siba N'Zatioula Grovogui, In this trenchant critique Siba N'Zatioula Grovogui demonstrates the failure of international law to address adequately the issues surrounding African self determination during decolonization Challenging the view that the only requirement for decolonization is the elimination of the legal instruments that provided for direct foreign rule *Sovereigns Quasi Sovereigns and Africans* shows that the principles recognized in international law today are not universal but instead reflect relations of power and the historical dominance of specific European states

Race, Racism, and International Law Devon W. Carbado, Kimberlé Williams Crenshaw, Justin Desautels-Stein, Chantal Thomas, 2025-08-19 What would it look like to place race at the center of international legal scholarship From its inception in the 70s and 80s critical race theory's target was the field of law revealing it to be a repository for racial power This particular critique of law was explosive because of law's putatively apolitical status making it a unique site for an intellectual sit in that has forever changed the way that race and racism are understood in American society Several decades later as indicators of populism and white nationalism spread across North America and Europe critical race theory remains markedly absent from discourses in global affairs and international law This volume opens the door for CRT to enter the international sphere Featuring contributions from 30 of today's leading scholars from around the world *Race Racism and International Law* explains how the concept of racial difference sits at the foundation of the legal political and social structures of hierarchy that shape the contemporary global order Helmed by four pioneering experts two in CRT and two in international law the volume's approach targets regimes of power and violence that implicate racism capitalism and colonialism This volume lays the groundwork for urgent and provocative new modes of critique and analysis

The Sovereignty Cartel J. Samuel Barkin, 2021-08-12 Sovereignty is the subject of many debates in international relations Is it the source of state authority or a description of it What is its history Is it strengthening or weakening Is it changing and how This book addresses these questions but focuses on one less frequently addressed what makes state sovereignty possible The Sovereignty Cartel argues that sovereignty is built on state collusion states work together to privilege sovereignty in global politics because they benefit from sovereignty s exclusivity This book explores this collusive behavior in international law international political economy international security and migration and citizenship In all these areas states accord rights to other states regardless of relative power relative wealth or relative position Sovereignty as a changing set of property rights for which states collude accounts for this behavior not as anomaly as other theories would but instead as fundamental to the sovereign states system

Re-Writing International Relations Zeynep Gülsah Çapan, 2016-09-14 The book presents a possible way of reading and re writing the Eurocentrism of International Relations The method proposed to re write histories of the manifestations and criticisms of Eurocentrism is through connected histories The first section of the book focuses on manifestations of Eurocentrism in and through disciplinary formations and geopolitical contexts This section explores the field of IR as a problematic unit that already assumes a coloniality of power It questions the existence of fields of study and the borders between them by examining the permeability between history and IR and highlighting how Eurocentric assumptions about world politics are reproduced in the different fields The second section of the book focuses on criticisms of Eurocentrism in and through disciplines and geopolitical contexts This section explores the different ways in which theoretical strategies criticizing Eurocentrism were formulated in conversation with each other across disciplines and geopolitical contexts

Withdrawal from Immanuel Kant and International Relations Mark F. N. Franke, 2023-12-01 This book shows how the flawed orientation forming Immanuel Kant s philosophical project is the same from which the discipline of International Relations IR becomes possible and appears necessary Tracing how core problems in Kant s thought are inescapably reproduced in IR this book demonstrates that constructive critique of IR is impossible through mere challenge to its Kantian traditions It argues that confrontation with the Kantian character of IR demands fundamental withdrawal from their shared aims Investigating the global limits inherent to epistemological and ontological commitments of

Kant's writings and IR this interdisciplinary study interrogates the racism sexism coloniality white male privilege and anthropocentrism of both as sites from which such withdrawal may be initiated Following queer and feminist examinations of how Kant and IR discipline a joint orientation through sex gender and sexuality it indicates how withdrawal is possible And considering how Anishinaabe legal tradition opens freedom beyond the restricting horizons of Kant and IR this book contemplates withdrawal from both as leading to a global unlimited An essential text for advanced undergraduate and graduate studies this book will also be of strong interest to those studying the thinking and writings of Kant neo and post Kantian scholarship and IR theory Rule in International Politics Christopher Daase, Nicole Deitelhoff, Antonia Witt, 2023-06-29 Demonstrates how rule is not only a feature of order in states but also in the international realm

Inter-State Communications and Human Rights, 2025-06-12 Developments at the international level over the past 5 years have re ignited the relevance of a mechanism that had remained dormant for decades inter state communications before UN treaty bodies Under utilised and consequently under studied inter state communications allow States to bring cases against other States for violations of their human rights obligations Given the strong human rights dimension of cases currently under consideration by the ICJ and other international disputes as well as the numerous and significant cases being presently considered by human rights treaty bodies and other human rights courts this edited volume seeks to consider the potential of inter state communications for promoting and ensuring respect for human rights around the globe *Can Muslims Think?*

Muneeb Hafiz, 2022-06-14 As Europe goes astray deeply conflicted about where it is within and with the world it does not know what it wants to know about or do with the racial subject In this situation the Muslim becomes an intense source of anxiety one that is at once terrifying and called to answer for Europe's existential fear of relegation Islamophobia thus represents both the racism constitutive of European modernity and is also symptomatic of contemporary transformations in racist power knowledge and governance propelled by technologies and economies of endless wars on terror But how might the Muslim speak about the world its past and unfolding terrors Which questions must she answer and which answers does Europe deem acceptable Presenting a speculative theory of the post racial subject of Islamophobia *Can Muslims Think* is an attempt to build a vocabulary for analyzing the complexities of racism today its potential futurity and techniques for its dismantling **Decolonizing International Relations**

Branwen Gruffydd Jones, 2006-09-15 The modern discipline of International Relations IR is largely an Anglo American social science It has been concerned mainly with the powerful states and actors in the global political economy and dominated by North American and European scholars However this focus can be seen as Eurocentrism *Decolonizing International Relations* exposes the ways in which IR has consistently ignored questions of colonialism imperialism race slavery and dispossession in the non European world The first part of the book addresses the form and historical origins of Eurocentrism in IR The second part examines the colonial and racialized constitution of international relations which tends to be ignored by the discipline The third part begins the task of retrieval

and reconstruction providing non Eurocentric accounts of selected themes central to international relations Critical scholars in IR and international law concerned with the need to decolonize knowledge have authored the chapters of this important volume It will appeal to students and scholars of international relations international law and political economy as well as those with a special interest in the politics of knowledge postcolonial critique international and regional historiography and comparative politics Contributions by Antony Anghie Alison J Ayers B S Chimni James Thuo Gathii Siba N Zatioula Grovogui Branwen Gruffydd Jones Sandra Halperin Sankaran Krishna Mustapha Kamal Pasha and Julian Saurin

Decolonisation of Legal Knowledge Amita Dhanda, Archana Parashar, 2012-04-27 The premise of this book is that legal theory in general and critical legal theory in particular do not facilitate the identification of choices being made in the different facets of law whether in the enacting interpreting administering or theorising of law

National Accountability for International Crimes in Africa Emma Charlene Lubaale, Ntombizozo Dyani-Mhango, 2022-02-07 This book critically examines the issues pertaining to the Rome Statute's complementarity principle The focus lies on the primacy of African states to prosecute alleged perpetrators of international crimes in their respective jurisdictions The chapters explore states international and domestic obligations to hold perpetrators of international crimes to account before the national courts and demonstrate the complexity of enforcing national accountability of alleged perpetrators of international crimes while also ensuring that post conflict African states achieve national healing reconciliation and sustainable peace The contributions reject impunity for international crimes whilst also considering these complexities Emphasis further lies on the meaning of accountability in the context of the politics of selective international criminal justice for crimes committed before the establishment of the International Criminal Court

Concepts in World Politics Felix Berenskoetter, 2016-08-09 Recognizing the vital importance of concepts in shaping our understanding of international relations this ground breaking new book puts concepts front and centre systematically unpacking them in a clear critical and engaging way With contributions from some of the foremost authorities in the field Concepts in World Politics explores 17 core concepts from democracy to globalization sovereignty to revolution and covers The multiple meanings of a concept where these meanings come from and how they are employed theoretically and practically The consequences of using concepts to frame the world in one way or another The method of concept analysis A challenging and stimulating read Concepts in World Politics is an indispensable guide for all students of international relations looking to develop a more nuanced and sophisticated understanding of world politics

Selective Responsibility in the United Nations Katy Harsant, 2022-08-30 The United Nations claims to exist in order to maintain international peace and security providing a space within which all states can work together But why then does the UN invoke its responsibility to protect through humanitarian intervention in some instances but not others Why is it that five states have the power to decide whether or not to intervene This book challenges the dominant narrative of the UN as an institution of equality and progress by analyzing the colonial origins of the organization and revealing the unequal power

relations it has perpetuated Harsant argues that the United Nations is unable to fulfill its claims around the protection of international peace and security due to its very structure and the privilege of certain states Moreover through a rigorous examination of the history of the UN and how those structures came to be she argues that the privilege afforded to these states is the result of power relations established through the colonial encounter In order to understand the pressing contemporary issues of how the United Nations operates particularly the Security Council this book discusses issues of power and sovereignty by de silencing the narratives of resistance and reconstructing a history of the United Nations that takes this colonial and anti colonial relationship into account This is a bold challenge to the eurocentrism that dominates International Relations discourse and a call to better understand the colonialism s role in preserving the existing global order

International Law and the Reconceptualization of Territorial Boundaries Joshua Castellino,2024-10-28 This book critically analyzes the state based regime of international law eliciting its colonial and decolonial origins and proposing a new sub regional basis for dealing with contemporary global challenges Since 1648 public international law has taken many steps to maintain peace and establish a just order The State is deemed central to each of these efforts Yet modern challenges such as environmental mitigation mass migration and the need to stimulate economic growth overwhelm the State Could a regional approach to these questions achieved in conjunction with strong sub national local governance establish a more effective framework for systemic change Drawing on a history of colonization and decolonization while scrutinizing decisions made about the imposition of the State on the basis of colonial boundaries this multidisciplinary work analyses why current challenges are unlikely to be adequately addressed through existing governance structures In response it advocates for a sub regional transnational approach drawing on analyses of pre colonial shared histories and contemporary population ethnographies unfettered by hegemonic boundary drawing The book argues that collaboration across such frontiers in the face of climate and other challenges may offer more feasible approaches to the pursuit of peace than the unquestioned maintenance of state based structures of inherited privilege This book will appeal to scholars and others with interests in international law international relations and international politics as well as in the history and politics of colonialism

Women's International Thought: A New History Patricia Owens,Katharina Rietzler,2020-12-16 The first cross disciplinary history of women s international thought analysing leading international thinkers of the twentieth century *Intervention Before Interventionism* Patrick Quinton-Brown,2024 Intervention before Interventionism is about the ways in which statespeople have re ordered intervention and non intervention since the middle of the twentieth century **Liberal Disorder, States of Exception, and Populist Politics** Valur Ingimundarson,Sveinn Jóhannesson,2020-12-20 Liberal democracy is in trouble This volume considers the crosscutting causes and manifestations of the current crisis facing the liberal order Over the last decade liberal democracy has come under mounting pressure in many unanticipated ways In response to seemingly endless crisis conditions governments have turned with alarming frequency to extraordinary

emergency powers derogating the rule of law and democratic processes The shifting interconnections between new technologies and public power have raised questions about threats posed to democratic values and norms Finally the liberal order has been challenged by authoritarian and populist forces promoting anti pluralist agendas Adopting a synoptic perspective that puts liberal disorder at the center of its investigation this book uses multiple sources to build a common historical and conceptual framework for understanding major contemporary political currents The contributions weave together historical studies and conceptual analyses of states of exception emergency powers and their links with technological innovations as well as the tension ridden relationship between populism and democracy and its theoretical ideological and practical implications The book will be of interest to scholars and students of a number of disciplines in the humanities and social sciences history political science philosophy constitutional and international law sociology cultural studies anthropology and economics International Law and Indigenous Peoples Joshua Castellino, Niamh

Walsh, 2005-03-01 This volume a collection of essays by a variety of scholars in the field of indigenous rights originates from the Irish Centre for Human Rights at the National University of Ireland in Galway It highlights those instances in the work of international organizations where advances have been made concerning indigenous rights It also devotes attention to the Permanent Forum on Indigenous Issues to the Committee on the Elimination of Racial Discrimination and to a number of thematic issues in the field The human rights situations facing indigenous peoples in Australia Bangladesh Canada India Kenya Mexico Nicaragua Nigeria and South Africa are dealt with in separate chapters These surveys show a range of reactions to the multiple problems of discrimination or lack of proper responses as far as domestic legislation national implementation of the laws and national compliance with the applicable international standards are concerned
