## **Soviet Environment Problems Policies And Politics:**

The Soviet Environment John Massey Stewart, 1992-05-07 This book originally published in 1992 describes the Soviet environment at its crisis point in the late 1980s and early 1990s. Belarus and the Ukraine had as a result of the Chernobyl accident been declared ecological disaster zones and across the country as a whole as many as 20 per cent of the population lived in environmental danger areas and another 35-40 per cent in unsatisfactory conditions. According to a Supreme Soviet Environment Committee report of 1989 80% of all illness in the USSR related either directly or indirectly to environmental problems. In this book leading specialists from both the West and the Soviet Union present a comprehensive analysis of these problems. The contributors examine the aftermath of Chernobyl the catastrophic causes and effects of the Aral Sea shrinkage the environmental issues and public unrest. The depth of analysis in this volume together with the breadth of topics addressed will ensure that it is read by students and specialists of the Soviet Union and environmental issues as well as by all government officials journalists and industrialists with an interest in the Soviet environment. *Scientific, Environmental, and Political Issues in the Circum-Caspian Region* M.H. Glantz, Igor S. Zonn, 2013-11-11 On behalf of the Russian Federation Committee on Water Economy I would like to welcome the participants of the NATO sponsored Workshop on the Problems of the Caspian Sea and the Circum Caspian States. The world's largest intercontinental sea lake is well known for its wealth mineral and fuel resources and sturgeon stocks the products of which oil and caviar are in constant demand on the world market. During the last half century the Caspian Sea has been the focus of the scientific community concerned with its level fluctuations. We were and still are solving a two faceted issue to rescue the Caspian Sea and to rescue the population from the Caspian Sea. To rescue the Caspian Sea is to address a broad spectrum of environmental issues related primarily to water pollution by waste water and petroleum products. To rescue the population from the Caspian Sea means that an almost 2.5 m sea level rise in the last two decades has resulted in flooding of vast coastal areas deteriorating economic and social spheres of activity. Solutions to these issues are linked to the numerous mysterious aspects of recent Caspian Sea behavior. Regrettably the collapse of the USSR has led to a decline of marine observations and control over the use of marine resources in the region. Coordinated international action on the protection of living marine resources have terminated generating disastrous consequences. **Environmental Consciousness** Stephen Hussey, Paul Richard Thompson, 2004 Across the globe environmental questions feature more and more in today's social and political agendas. In Western countries environmental campaigns target issues at home and abroad. They have a special urgency which draws in an astonishing range of field campaigners from young militants to rebel aristocrats. This book examines the roots of contemporary environmental consciousness and action in terms of both popular experience and tradition. The global reach of this book reflects the character of contemporary environmentalism. It examines a geographically and thematically diverse range of case studies including British environmental campaigners in the Brazilian rainforest ecocriticism and literature the environmental

movement in Kazakhstan and medieval church iconography The common theme linking each chapter is that environmental consciousness and activism are shaped through people's life stories and that their memories are shaped not only through individual experience but also through myth tradition and collective memory Containing a wealth of empirical source material Environmental Consciousness will be invaluable for sociologists and historians alike It offers a cutting edge illustration of how narrative and oral history can illuminate our understanding of an uncertain present Stephen Hussey is a research associate at the School of Education at the University of Cambridge His previous publications include Childhood in Question and his next publication will be a book for the wider market entitled Headline History Paul Thompson is research professor in sociology and director of Qualidata at the University of Essex He is also founder of the National Life Story Collection at the British Library National Sound Archive and founder editor of Oral History His previous publications include The Voice of the Past The Edwardians and The Work of William Morris

**Environmental Problems in East-Central Europe** Frank Carter, David Turnock, 2002-09-26 In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed The attempts to bring environmental legislation into line with West European norms is also described Environmental Problems of East Central Europe looks at air and water pollution modern farming water supplies waste management and landscape protection These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs European Union assistance civil society and the work of environmental NGOs are also discussed All of these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States Environmental Problems in East Central Europe provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the bases of fair share of the earth's resources

**The Soviet Union and Global Environmental Change** Jonathan D. Oldfield, 2021-05-26 This book argues that the Soviet Union was a highly influential actor in furthering understandings of society nature interaction on the international stage and played a key role in helping to shape conceptualize and assess the relationship between humankind and the Earth system It considers how humankind's capacity to affect physical and biological systems at a global scale was acknowledged and studied by Soviet scientists discusses how the interaction between Soviet and Western

scientists stimulated the development of new technologies and insights which simultaneously facilitated a more profound understanding of the Earth's physical and biological systems and explores how Soviet scientists drew upon pre-revolutionary intellectual traditions in order to make sense of society-nature interaction and did so in collaboration with a range of international initiatives. Overall, the book provides a deep analysis of how Soviet scientists conceptualized society-nature interaction and influenced the understanding of global physical and biological systems. Furthermore, it is argued that this intellectual legacy remains of importance today with respect to the activities of Russian science and contemporary global environmental challenges.

**Environmental Resources And Constraints In The Former Soviet Republics** Philip Pryde, 2019-06-03 The rapid changes in the former Soviet Union have rendered most pre-1992 works on its environment obsolete. A more specifically geographic approach that highlights the particular situation in each republic and region is offered by Philip R. Pryde's new work *Environmental Resources and Constraints in the Former Soviet Republics*. Focusing on

**The Rhetorical Rise and Demise of "Democracy" in Russian Political Discourse, Volume 1** David Cratis Williams, Marilyn J. Young, Michael K. Launer, 2021-12-14 The essays in this book examine the arguments and rhetoric used by the United States and the USSR following two catastrophes that impacted both countries as blame is cast and consequences are debated. In this environment, it was perhaps inevitable that conspiracy theories would arise, especially about the downing of Korean Air Lines Flight 007 over the Sea of Japan. Those theories are examined, resulting in at least one method for addressing conspiracy arguments. In the case of Chernobyl, the disaster ruptured the social compact between the Soviet government and the people; efforts to overcome the resulting disillusionment quickly became the focus of state efforts.

**Wilderness Protection in Europe** C. J. Bastmeijer, Kees Bastmeijer, 2016-04 Assesses to what extent wilderness areas in Europe receive protection under international conventions, EU directives, and domestic law.

**The Great Acceleration** J. R. McNeill, Peter Engelke, 2016-04-04 The pace of energy use, greenhouse gas emissions, and population growth has thrust the planet into a new age: the Anthropocene. Humans have altered the planet's biogeochemical systems without consciously managing them. *The Great Acceleration* explains the causes, consequences, and uncertainties of this massive uncontrolled experiment.

**Geography and Ethics** James D. Proctor, David M. Smith, 2002-09-11 This book represents a landmark exploration of the common terrain of geography and ethics. Drawing together specially commissioned contributions from distinguished geographers across the UK, North America, and Australasia, the place of geography in ethics and of ethics in geography is examined through wide-ranging thematic chapters. *Geography and Ethics* is divided into four sections for discussion and exploration of ideas: Ethics and Space, Ethics and Place, Ethics and Nature, and Ethics and Knowledge, all of which point to the rich interplay between geography and moral philosophy or ethics.

**The Emancipation of Soviet Law** Ferdinand J. M. Feldbrugge, 2023-08-28 The political, economic, and social reforms resulting from Gorbachev's perestroika have become more radical and comprehensive throughout the years. Increasingly in their implementation, a central role has

been accorded to law The construction of a viable democratic system the establishment of an economy in which market factors are decisive the readmittance of a pluralistic civil society all of them presuppose in the eyes of the present Soviet leadership the creation of a reliable legal foundation Legislative activity in the Soviet Union during the past few years has therefore been hectic At the same time while law was being used as an instrument of change the character of Soviet law itself was deeply affected From being the obedient servant of a totalitarian master law is becoming the core element of a new order in which its supremacy is accepted as the starting point for redesigning all the major sectors of social life In this volume a number of leader Western experts consider the practical effect of this emancipatory process on the most important branches of Soviet law and investigate its philosophical dimensions Building a Common Past Corinne Geering,2019-11-11

How did a kremlin a fortified monastery or a wooden church in Russia become part of the heritage of the entire world Corinne Geering traces the development of international cooperation in conservation since the 1960s highlighting the role of experts and sites from the Soviet Union and later the Russian Federation in UNESCO and ICOMOS Despite the ideological divide the notion of world heritage gained momentum in the decades following World War II Divergent interests at the local national and international levels had to be negotiated when shaping the Soviet and Russian cultural heritage displayed to the world The socialist discourse of world heritage was re evaluated during perestroika and re integrated as UNESCO World Heritage in a new state and international order in the 1990s

**The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin** M.G. Bos,2012-12-06 The irrigated area in the Aral Sea basin totals about 7 5 million hectare Part of the water supplied to this area is consumed by the irrigated crop the remainder of the supplied water drains to the groundwater basin to downstream depressions or back to the rivers During its use however this drained part of the water accumulates salts and chemicals The disposal of this polluted water causes a variety of environmental problems If the percentage consumed water of the total water supply to an irrigated area the so called overall consumed ratio can be increased less water needs to be drained This alleviates part of the related environmental problems Further if the overall consumed ratio for the above 7 5 million hectare is improved less water needs to be diverted from the rivers Hence more water can flow towards the Aral Sea As mentioned above part of the non consumed irrigation water drains to the groundwater basin Commonly the natural discharge capacity of this basin is insufficient to handle this imported water As a result the groundwater table rises towards the land surface causing waterlogging In semi arid zones this waterlogging triggers a soil salinity problem resulting to a significant reduction in crop yields The artificial increase of the discharge capacity and lowering of the groundwater table solves the soil salinity problem

**Gender, Equality and Education from International and Comparative Perspectives** David Baker,Alexander W. Wiseman,2009-04-03 Investigates the often controversial relationship between gender equality and education from international and comparative perspectives This volume also investigates whether gender equality in education is really being achieved in schools around the world or not

Environmental Security in the Asia-Pacific I. Watson, C. Pandey, 2015-06-16 This book focuses on both North-South and South-South relations to reveal an understanding of major climate change and climate change management issues through practices and narratives of environmental security in a specific regional context

**Central Asia** Tom Everett-Heath, 2003 Examines the transition Central Asia underwent in the twentieth century following the collapse of the Soviet Union the Soviet colonial legacy and the attempts of new states to build secular states within the radical Islamic world

**Democracy And Environmental Movements In Eastern Europe** Katy Pickvance, 2019-03-13 Democracy and Environmental Movements in Eastern Europe A Comparative Study of Hungary and Russia is a systematic comparison of environmental activism and more broadly collective democratic action in two former state socialist societies Based on extensive research Katy Pickvance offers us a study in contrasts Russia stands as an example of contrast

**Shades of Green** Alan Frizzell, 1997-05-15 Is there a real community of interest on the state of the environment that transcends national boundaries An answer to this vital question will ultimately determine the success or failure of initiatives where international co-operation and co-ordination are essential such as atmospheric or water pollution controls Shades of Green volume two of the ISSP International Social Survey Programme series analyzes data from identical surveys conducted in 22 countries and tackles a wide range of attitudes and priorities Expectations of government in terms of environmental protection a comparison of Canada U.S. results the level of knowledge on environmental issues from country to country the perceived role for science in solving ecological problems and attitudinal differences between the West and states of the former Soviet Union these issues have serious implications for the environmental movement and government policies worldwide
