The Six Sigma Performance Handbook Praveen Gupta, 2005 Publisher's Note Products purchased from Third Party sellers are not guaranteed by the publisher for quality authenticity or access to any online entitlements included with the product. Written with managers not statisticians in mind this reference shows readers how to statistically evaluate a Six Sigma program identify problems and make tailor made adjustments to get the desired results and revitalize a program. Profits in tough times require prioritization and focus. If properly managed Six Sigma methods can deliver dramatic improvement by increasing manufacturing and process efficiencies. But nearly 60% of all corporate Six Sigma initiatives fail to yield the desired results often companies take the fighting fires approach to business and do not take time to understand what the data is telling them which is why many Six Sigma projects fail. The high visibility of the Six Sigma Initiative has corporate executives committing to significant investment in resources often without any tangible improvement in profitability a fact neglected by most Six Sigma books. Written with Green belts and managers in mind this reference shows readers how to statistically evaluate a Six Sigma program identify problems and make tailor made adjustments to get the desired results and revitalize a program.

First-Time-Right Procurement Oliver Münch, 2015-01-27. Based on more than 10 years of practical experience in the field of supply chain management, Oliver Münch indicates that in favor of sustainability within the supply chain, the paradox purchasing savings can and should be substituted with the approach of the First Time Right Procurement. This dissertation subjects the monetary measurement of purchasing savings to a critical examination and questions whether it still applies. It indicates that monetary purchasing savings exert a negative impact on sustainable company success. In order to achieve a long term sustainable success, it is proposed that the monetary measurement of purchasing savings can be replaced by measuring process times within the procurement organization.
