know before or after you read Elizabeth Kolbert's book *Crafted* and edited with care. Worth Books set the standard for quality and give you the tools you need to be a well-informed reader. This short summary and analysis of *The Sixth Extinction: An Unnatural History* by Elizabeth Kolbert includes historical context, chapter-by-chapter overviews, detailed timeline of key events, important quotes, fascinating trivia, glossary of terms, supporting material to enhance your understanding of the original work, and about *The Sixth Extinction* by Elizabeth Kolbert. Our planet has endured five events of mass extinction from centuries of catastrophic heating and cooling to the asteroid that fell to earth and ended the Cretaceous Period. We are currently facing the sixth extinction, and this time the human species is to blame. Elizabeth Kolbert travels the world and meets with scientists who are grappling with the ecological outcomes of human activity. Her Pulitzer Prize-winning modern science classic tells the stories of thirteen different species that have already disappeared or are on the brink of extinction as a result of human activity. A captivating blend of research and historical anecdotes enlightens readers about the unintentional consequences of our behaviors from climate change and global warming to invasive species and overexploitation. The summary and analysis in this ebook are intended to complement your reading experience and bring you closer to a great work of nonfiction.

The Sixth Extinction Instaread, 2015-09-15. PLEASE NOTE: This is key takeaways and analysis of the book and NOT the original book *The Sixth Extinction* by Elizabeth Kolbert. Key Takeaways Analysis Review Preview. *The Sixth Extinction* is a book by award-winning journalist Elizabeth Kolbert. In this book, the author demonstrates that species are dying out at a rate comparable to the previous mass extinctions, and if the trend of global warming, deforestation, and pollution continues in its present course, the numbers of extinct species will meet or exceed that rate of destruction. This event will include the extinction of humanity. What this means is that the current loss of life today will soon justify the term *The Sixth Extinction*, a mass extinction like the one that destroyed the dinosaurs 65 million years ago. When humans originated about 100,000 years ago, they began to hunt some species into extinction. Their ability to outcompete other early hominids for food led to the extinction of those species, including Neanderthals. The extinction of species picked up steam when humans began transforming great swaths of forest and plains into farmland about 10,000 years ago. The X-Files and Literature Sharon R. Yang,2009-10-02 The X Files and Literature Unweaving the Story Unraveling the Lie to find the Truth provides an innovative and valuable exploration of the groundbreaking television program Although much academic work has been devoted to the social psychological and spiritual significance of The X Files until this collection none has fully addressed the series rich adaptation of literature to interrogate our perception definition or recounting of the truth This collection not only unveils new twists and insights into expected connections between The X Files and Gothic writers or with its modernist and post modernist slants on narrative plot and characterization The X Files and Literature also delves into some unexpected literary sources shaping the series such as the Arthurian quest Catholic and Biblical mythology folkloristics and James Fennimore Cooper and the vanishing American mythos This collection of essays covers both how The X Files works with literature s own constantly morphing definition and portrayal of truth through form

and content as well as how the television program may or may not subvert our own contradictory expectations and distrust of literature's providing us with enlightenment. As television becomes more and more literary with shows like *Lost* and *Gilmore Girls* sending us off to the bookstore and the library so we might read them more carefully, a book like *The X-Files and Literature* is welcome indeed. Sharon R. Yang's diverse collection on one of Nineties TV's richest texts finds the truth of the gothic and the Arthurian and the folkloric of the postmodern and the metafictional of Poe, Pynchon, Cooper, Nabokov, and Tennyson not just out there but in the perhaps too complicated narrative of the perpetually frustrated quests of Mulder and Scully. Valuable in itself as an intellectual exercise, its real worth may come when we put the book down and return smarter, better readers to the primary text. David Lavery, Co-Editor, *Deny All Knowledge: Investigating The X-Files*. Sharon Yang's *X-Files* collection deals with an important subject addressed by thoughtful writers. The idea that television can be seen as a branch of literature is certainly sustained by *The X-Files* and the contributors to this volume succeed in making the case. Brian Hauser on Fenimore Cooper, Cary Jones on Mary Shelley, Tamy Burnett on Poe, Thomas Argiro on Pynchon, Matthew VanWinkle on Tennyson: these and more explore the connections with *The X-Files* not only in terms of sources but also themes and techniques. Both students of television and literature will want to own this book. Rhonda V. Wilcox, Ph.D., Professor of English, Gordon College, Barnesville.
