**Radical Skepticism and the Shadow of Doubt** Eli Hirsch, 2017-12-28 *Radical Skepticism and the Shadow of Doubt* brings something new to epistemology both in content and style. At the outset we are asked to imagine a person named Vatol who grows up in a world containing numerous people who are brains in vats and who hallucinate their entire lives. Would Vatol have reason to doubt whether he himself is in contact with reality? If he does have reason to doubt, would he doubt or is it impossible for a person to have such doubts? And how do we ourselves compare to Vatol? After reflection, can we plausibly claim that Vatol has reason to doubt but we don't? These are the questions that provide the novel framework for the debates in this book. Topics that are treated here in significantly new ways include the view that we ought to doubt only when we philosophize, epistemological dogmatism, and connections between radical doubt and having a self. The book adopts the innovative form of a dialogue play. The three characters who are Talmud students as well as philosophers hardly limit themselves to pure philosophy but regale each other with Talmudic allusions, reminiscences, jokes, and insults. For them, the possibility of doubt emerges as an existential problem with potentially deep emotional significance. Setting complex arguments about radical skepticism within entertaining dialogue, this book can be recommended for both beginners and specialists.

The reputation of business managers is declining due to their disregard for moral decisions and ethical practices. Business students are currently taught only technical knowledge without concern for being compassionately and holistically engaged. However, when entering the business sector, these graduates encounter a world which necessitates difficult, personally challenging decisions, ones for which technical knowledge is insufficient. Successful, sustainable resolutions can only be expected to result from a holistic, sustainable approach which accommodates the difficulty in balancing ethical practices with the demands for ever-increasing profits. This unique graduate textbook addresses the issue of business ethics from the perspective of an individual's internal growth, facilitated by a consideration of the principles of depth psychology, spiritual wisdom, meditation, and quantum physics, written by a CEO with an enormous business background. It not only promotes a new ethical approach but also addresses the implementation of this new approach in the most important business sectors as a replacement for previous ineffective codes of conduct which have failed. It's a must-read for business students with aspirations of becoming managers or entrepreneurs in the economic sector, as well as for all young professionals, managers, and entrepreneurs to improve their ethical performance and sustainable success.

Message from the author: This book creates an impetus for change in a business world where unethical practices are rampant by providing a suggested New Integral Ethics for the economy, an ethical approach based upon inner psychological and spiritual development arising from a serious consideration of Depth Psychology. Readers will learn how adoption of specific Practices which lead to inner growth and spiritual maturity will result in ethical, morally sound business practices, not because they are mandated, but because once the SELF is actualized, you cannot do otherwise. Laws, appeals, and directives which have never successfully resulted in ethical practices become unnecessary, replaced by intrinsically ethical individuals who collectively influence corporate ethical behaviour. This is a giant leap into a new dimension in our globalized, digitized economy.

*Business Ethics 3.0* by Erhard Meyer-Galow provides a much-needed beacon of light to a segment of our society that seems to be sinking deeper and deeper into darkness. The term business ethics, once an important topic within the business community, has slowly descended through the fog of profitable ends justifying unprincipled means to become nothing more than a self-contradictory oxymoron, especially among large international corporations. In *Business Ethics 3.0*, Erhard Meyer-Galow has taken a fresh approach that appeals to individual personal growth rather than the usual proffering of academic arguments that are not implementable in the real world of relentless Machiavellian competition. Only through raising and improving

individual awareness and responsibility can real long term change have a chance of developing Business Ethics 30 is on the right track with a positive and compelling message may it succeed where the academics have failed Thomas Campbell physicist consciousness researcher author of My big TOE Finalist at the 2018 Humanistic Management Book Awards
