Taxes On Knowledge In America:

Taxes on Knowledge in America Randall P. Bezanson, 1994-04-29 In *Taxes on Knowledge in America* Randall P. Bezanson explores the extent to which the publication and distribution of current public information is effected by economic exactions. The book begins with a brief overview of the English history and experience with knowledge taxes before turning to a discussion of knowledge taxes in America from colonial times to the present. In addition to covering traditional printed publications, Bezanson looks at recent developments in broadcast and cable telecommunications, devotes a chapter to the history of the postal system, and gleans insight from three benchmark Supreme Court decisions. Bezanson provocatively concludes that knowledge is common property and knowledge taxes should be measured by their impact on the diversity of ideas and availability of information throughout society.

Taxation and Resentment Andrea Louise Campbell, 2025-06-10 Why Americans favor progressive taxation in principle but not in practice. Most Americans support progressive taxation in principle and want the rich to pay more. But the specific tax policies that most favor are more regressive than progressive. What is behind such a disconnect? In this book, Andrea Louise Campbell examines public opinion on taxation, exploring why what Americans favor in principle differs from what they accept in practice. Campbell shows that since the federal income tax began a century ago, the rich have fought for lower taxes through reduced rates and a complicated system of tax breaks. The resulting complexity leaves the public confused about who benefits from the convoluted tax code and leads to tax preferences that are driven by factors other than principles or interests. Campbell argues that tax attitudes vary little by income or by party, as some Democrats, more Republicans, and even more independents want most taxes decreased. Instead, white opinion on nearly every tax is racialized. Many do not realize the rich benefit the most from tax breaks, attitudes toward which are racialized too. And among Black and Hispanic Americans, long subject to government coercion, greater support for government spending is not matched by greater support for taxation. Everyone has a reason to dislike taxes, which helps antitax Republicans win votes and helps the rich in their long campaign to get their own taxes reduced and undermine progressivity.
