Taxing Times A Guide To Australia's Tax Debate:

Taxing Times John Quiggin, 1998 Taxation is perhaps the longest running subject for debate in Australian politics In this book John Quiggin argues that a GST on its own will not restore the credibility of the tax system **The Politics of Income Taxation** Steffen Ganghof, 2024-10-31 Marginal income tax rates in advanced industrial countries have fallen dramatically since the mid 1980s but levels and progressivity of income taxation continue to differ strongly across countries This study offers a new perspective on both observations It blends theoretical inquiry with focused quantitative analysis and in depth investigation of seven countries Germany Australia and New Zealand as well as Denmark Finland Norway and Sweden The Politics of Income Taxation highlights the equity efficiency tradeoffs that structure the politics of income taxation and analyses how income taxes are embedded in broader tax systems It explains the limited but enduring importance of political parties and democratic institutions Finally the study paints a nuanced picture of the role of globalisation and thus sheds light on the pros and cons of tax coordination at European and international levels Taxing Reforms Richard Eccleston, 2007-01-01 Taxing Reforms is a good short book about the comparative policies of Value Added Taxation VAT in Australia Canada Japan and the United States Taxing Reforms is a fine book well worth reading especially for specialists in the comparative political economy of taxation its richly detailed case studies will make it a fruitful source of comparative hypotheses Isaac W Martin Journal of Economic Literature *The Unemployment Crisis in Australia* Stephen Bell, 2000-06-06 Since the 1970s the average level of unemployment in Australia has risen each decade This has imposed huge economic social and human costs making unemployment one of the most pressing problems confronting Australia Governments however seem powerless in the face of this problem Drawing on the expertise of some of Australia's leading economists this book first published in 2000 argues that the currently fashionable approaches of wage cuts and further steps towards labour market flexibility will not solve the unemployment problem In reality unemployment and rising inequality are symptoms of the growing failure of contemporary labour markets to distribute jobs and incomes effectively The contributors argue that the main solution to this problem is not wage cuts but jobs growth This important book points to a way beyond the current policy malaise and offers detailed solutions to unemployment **Unsw Press** Charlotte Jarabak, 2002 A complete listing of all 721 titles published since the inception of UNSW Press in 1962 *The Rise of the Value-Added Tax* Kathryn James, 2015-04-30 This book explores one of the most significant trends in the evolution of global tax systems by asking how within less than half a century the value added tax VAT has risen from relative obscurity to become one of the world's most dominant revenue instruments Despite its significance very little is known about why so many countries have adopted the VAT and in particular why different countries adopt the types of VAT that they do The popular mythology provides that the merits of the VAT have underpinned its global spread however this book contends that much scholarship confuses the question of why the VAT has risen to dominance with the issue of what makes a good VAT This book combines policy and

legal analysis to propose a new way of understanding the rise of this important revenue instrument so as to better reflect the realities of the VATs that are actually implemented
