Tinkering Kathleen Franz, 2011-06-07 In the first decades after mass production between 1913 and 1939 middle class Americans not only bought cars but also enthusiastically redesigned them By examining the ways Americans creatively adapted their automobiles *Tinkering* takes a fresh look at automotive design from the bottom up as a process that included manufacturers engineers advice experts and consumers in various guises Franz argues that automobile ownership opened

new possibilities for ingenuity among consumers even as large corporations came to control innovation Franz weaves together a variety of sources from serial fiction to corporate documents to explore tinkering as a form of authority in a culture that valued ingenuity Women drivers represented one group of consumers who used tinkering to advance their claim to social autonomy Some canny drivers moved beyond modifying their individual cars to become independent inventors patenting and selling automotive accessories for the burgeoning national demand for aftermarket products Earl S Tupper was one such tinkerer who went on to invent Tupperware These savvy tinkerers worked in a changing landscape of invention shaped increasingly by automotive giants By the 1930s Ford and General Motors worked to change the popular discourse of ingenuity and used the world's fairs of the Depression as a stage to promote a hierarchy of innovation Franz not only demonstrates the entrepreneurial spirit of American consumers but she engages larger historical questions about gender consumption and ingenuity while charting the impact corporate expansion on tinkering during the first half of the twentieth century

domesticity in the United States While boarding's historical importance is indisputable its role in the period's literary production has been overlooked In *Boarding Out* David Faflik argues that the urban American boardinghouse exerted a decisive shaping power on the period's writers and writings Addressing the works of canonical authors such as Henry David Thoreau Nathaniel Hawthorne and Oliver Wendell Holmes as well as neglected popular writers of the era such as Fanny Fern and George Lippard Faflik demonstrates that boarding was at once psychically artistically and materially central in the making of our shared American culture

Profound Science and Elegant Literature Stephanie P. Browner, 2013-03-26 In 1847 at the first meeting of the American Medical Association the newly elected president reminded his brethren that the profession once venerated no longer earned homage spontaneously and universally The medical marketplace was crowded and competitive state laws regulating medical practice had been repealed and professional practitioners were often branded by their lay competitors as aristocrats bent on establishing a health care monopoly By 1900 the battles were over and as the president of AMA had hoped doctors were now widely venerated as men of profound science elegant literature polite accomplishments and virtue In fact by 1900 the doctor had replaced the minister as the most esteemed professional in the United States disease loomed larger than damnation and science promised to manage the discord differences and excesses that democracy seemed to license In *Profound Science and Elegant Literature* Stephanie Browner charts this trajectory and demonstrates at the same time that medicine's claims to somatic expertise and managerial talent did not go uncontested Even as elite physicians founded institutions that made professional medicine's authority visible and legitimate many others worried about the violence that might attend medicine's drive to mastery and science's equation of rational disinterest with white educated masculinity Reading fiction by a wide range of authors beside

and against medical texts Browner looks to the ways in which writers such as Hawthorne Melville Holmes James Chesnutt and Jewett inventoried the collateral damage that might be done as science installed its peculiar understanding of the body A work of impressive interdisciplinary reach *Profound Science and Elegant Literature* documents both the extraordinary rise of professional medicine in the United States and the aesthetic imperative to make the body meaningful that led many American writers to resist the medicalized body *Made in America* Jeffrey Louis Decker,1997 Success stories on self made people
