There's evidence of so much more than reading, writing, and arithmetic in every child at

least seven distinct intelligences according to the theory of multiple intelligences developed by Harvard's Dr Howard Gardner. In *Seven Times Smarter*, veteran educator Laurel Schmidt offers a parent friendly explanation of this theory and of the ways that kids are simply put word smart, picture smart, music smart, body smart, logic smart, people smart, and self smart. These intelligences aren't fixed at birth. They can be nurtured and strengthened meaning that in the right environment kids get smarter. *Seven Times Smarter* an invaluable resource for parents, teachers, and caregivers provides the perfect way to create this environment. Unlike other craft or activity books that just fill time and keep kids busy, *Seven Times Smarter* prompts kids aged six to fourteen to work their brains and cultivate new skills using recycled or low cost materials found in every home and enjoy it. It offers an exploration of what it means to be smart, checklists to recognize the seven intelligences in your child, book lists to develop and celebrate all the ways your child is smart, and fifty creative constructive activities that are good for kids playing alone or in a group supervised or independently including Memory Tours. If a memory book is too straightforward for your artistic child, try an unbook, a memory box, or a calendar. Hanging Gardens Indoors or out, even the smallest garden plot can yield a bumper crop of mathematical, linguistic, scientific, and kinesthetic skills. *The Boredom Brigade* Boredom is a springboard for imagination, imaginary structures, identities, occupations, and friends are just some of the ways kids develop their inter and intra personal intelligences. *Junk Yard Genius* There's an education in junk, in fact it's easy to turn your broken radio, alarm clock, fan, blow dryer, or scale into a project that could fascinate kids for days. **Billboard**

At each stage of development, the brain's ability to gain new skills and process information is refined. As a leading researcher at the University of California at Berkeley, Marion Diamond has been a pioneer in this field of research. Now Diamond and award winning science writer Janet Hopson present a comprehensive enrichment program designed to help parents prepare their children for a lifetime of learning.

The Private Music Instruction Manual Rebecca Osborn, 2004 Future and current independent private music educators will find this book an invaluable resource for establishing and maintaining a private music studio. Private music instructors will learn what they should expect professionally, personally, and financially from their independent music instruction business. Until now, no single resource has existed that fully explains how to run this type of business successfully. This book presents all aspects of private music instruction through an easy to read, concise, and engaging instructional format. Following the sound advice presented will help to greatly alleviate the problems that all beginning independent instructors

face by specifically mapping out chronological steps for establishing and maintaining a private instruction music business. The field of private music education has been inundated by less than professional individuals who have made it difficult for legitimate qualified instructors. The Private Music Instruction Manual shares years of information and experiences in the hope of legitimizing the field of private music instruction. In a world where there is decreasing priority and structure in public music education, private music instructors become increasingly important to prepare the next generation of musicians. No matter the size of your private music instruction business, the advice presented in The Private Music Instruction Manual will help to improve any private music business. From the Midwest Book Review: With The Private Music Instruction Manual: A Guide For The Independent Music Educator, author Rebecca Osborn draws upon her many years of experience and expertise as an adjunct college music professor and owner of three private music studies to write an informed and informative guidebook specifically for musicians and music instructors who want to teach students in a profitable private practice but are not familiar with or knowledgeable about setting up a music instruction business enterprise. Rebecca Osborne provides a wealth of invaluable professional, effectively organized and presented instructions on establishing and maintaining a music teaching business and shows what to expect professionally and financially from independent music instruction. If you want to make money teaching other how to play any kind of music instrument, then you need to give a careful and profitable reading to Rebecca Osborn's *The Private Music Instruction Manual*. *Songs in Their Heads* Patricia Shehan Campbell, 2010. This book explores the meaning and value of music in children's lives based upon their expressed thoughts and actual musicking behaviors in school and at play. Blending standard education field experiences with ethnomusicological techniques, Campbell demonstrates how music is personally and socially meaningful to children and what values they place on particular musical styles, songs, and functions. She explores musical behaviors in various contextual settings: in the outdoor garden of the Lakeshore Zebras preschool, in Mr. Roberts' fifth grade classroom, on a school bus, at home with the Anderson family, in the Rundale School cafeteria, at the Toys and More Store. She documents in narrative forms some of the songs in their heads, balancing music learned with music made and intentional purposeful music with natural music behavior. From age three to tween age, children are particularized by gender, race, ethnicity, and class, and their soundscapes are described for the contexts, functions, and meanings they make of music in their lives. Treading through the individual cases and conversations is the image of the universal child, children's culture that transcends localities, separates them from adults, and defines them as their own community of shared beliefs and practices. *Songs in Their Heads* is a vivid and engaging book that bridges the disciplines of music education, ethnomusicology, and folklore. Designed as a text or supplemental text in a variety of music education methods courses, as well as a reference for music specialists and classroom teachers, this book will also appeal to parents interested in understanding and enhancing music making in their own children. *Billboard*, 1998-09-05.
