

If the invention at this stage shows sufficient commercial potential to warrant further development (and resources for development are available) (5.4), an external patent lawyer (see [TDC Policy & Resource Summary](#)) with the appropriate domain expertise should be contacted to draft and file a provisional patent application under trademark (see also [TDC Policy](#)) (5.5). Assessment of the IP should be done according to the existing TDC Policy ([TDC Policy](#)). The technical report received from the Research Delivery [institutions](#) should be [aligned](#) for drafting of patent. If additional information is required FPOs should be consulted.

5.4 & 5.5 & 5.6

If the TTAC decided that further technology development in the prototype stage is required, the process commences to the development of a value case (5.7). The value case should be developed by the TTAC by integrating all the [Value Case Template](#), and the TTAC should also be evaluated in complex cases e.g. whether market analysis is required taking into account technology is already developed to address a market need. The purpose of the value case is to obtain an overview of the opportunity, context, strategy, IP management, resources, funding required, and commercialisation potential. In developing the value case, the TTAC should make use of the [TDC Policy & Resource Summary](#) in order to determine the potential key partners (KPs) and the resource partners that may be required.

5.7

Once the value case has been developed and provided to the TTAC, the TTAC need to decide (5.8) whether technology development should proceed to the prototype phase with identified KPs and resources or should be revised (5.8) or be discontinued. The assessment by the TTAC should be done by using the [Value Case Template](#).
