Building Application Servers Rick Leander, 2000-02-13 To address new demands in business computing software vendors are introducing application server toolkits The concept is to create clusters of low cost computers that support one specific business area then connect these clusters to the corporate network By using the network as the computer one piece of software can support desktop computing electronic commerce and communication with traditional mainframe software Building Application Servers is a practical guide to application server technology explaining the theory of network computing and providing practical techniques that use these tools to produce effective business solutions Rick Leander includes practical examples and program code that use UML Java RMI and JDBC to illustrate design problems and programming techniques The development framework offered spans a variety of platforms vendors and middleware architectures Software developers who are familiar with traditional client server technology but want to learn how to move to distributed client server computing will find this book invaluable

Enjoying the Song of Phrase: An Psychological Symphony within **Teach Yourself Odbc Programming In 21 Days**

In a world taken by displays and the ceaseless chatter of instant connection, the melodic splendor and mental symphony produced by the prepared term frequently diminish in to the back ground, eclipsed by the relentless sound and disturbances that permeate our lives. However, located within the pages of **Teach Yourself Odbc Programming In 21 Days** a wonderful literary prize full of organic feelings, lies an immersive symphony waiting to be embraced. Crafted by a masterful composer of language, that fascinating masterpiece conducts viewers on an emotional trip, well unraveling the hidden tunes and profound affect resonating within each carefully crafted phrase. Within the depths of this emotional assessment, we shall examine the book is main harmonies, analyze its enthralling publishing type, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
