Hall, Linda F. Quinn, Donna M.

Gollnick, 2018-11-29 An ideal introductory text for aspiring teachers Introduction to Teaching Making a Difference in Student Learning is grounded in the realities and complexities found in today's schools Acclaimed authors Gene E Hall Linda F Quinn and Donna M Gollnick thoroughly prepare readers to make a difference as teachers presenting firsthand stories and evidence based practices while offering a student centered approach to learning The authors focus on how to address one of the biggest challenges facing many of today's schools ensuring that all students are learning and help teachers prioritize student learning as their primary focus From true to life challenges that future teachers will face such as high stakes testing reduced funding low retention and Common Core State Standards to the inspiration and joy they will experience throughout their teaching careers the Third Edition paints an importantly authentic picture of the real life of a teacher **Voices from the Classroom** Brian Hand, Lori Norton-Meier, 2011-10-25 There is much attention currently being given to argument based inquiry in national and state curriculum documents Students are being required to be able to generate and evaluate science knowledge and to think critically and judge the value of evidence and explanations The intent of the book is to provide a rich and broad view of the impact of argument based inquiry in the elementary classrooms from the perspective of the teacher All

the teachers and professional development authors were engaged in promoting and using argument based inquiry as the approach to teaching science They were implementing the Science Writing Heuristic SWH approach as the argument based approach for classroom practice As researchers we constantly work to present our views of these experiences with the voice of the teachers only being relayed through the perspective of the researcher The intent of this book is to provide an opportunity for us as a community to listen to what the teachers are telling us Importantly as demands are being placed on classroom experiences that provide opportunities for students to pose questions make claims and provide evidence that is to think critically and reason like scientists we need to understand what this looks like from the perspective of the teacher This book brings together a range of elementary teachers from kindergarten through to year 6 who have used the Science Writing Heuristic approach to teach argument based inquiry These teachers have all gone through professional development programs and successfully implemented the approach at a high level
