

# 7 brilliant lesson planning tips from teachers.

## Add learning intentions

Learning intentions set the scene for students and tell them what to expect for the lesson, and it's crucial to give them real-world context and ensure that the language you use is precise and suitable for their age. You can use acronyms, like **WALT** (we are learning to), **WILF** (what I'm looking for) and **TIB** (this is because) to engage them.

## Work in cycles for each lesson

- ✓ **Model:** show the students how to complete an activity before starting, using examples and non-examples.
- ✓ **Practise together:** students work together and with your help to complete the activity.
- ✓ **Practise independently:** once students are comfortable, they can try completing the activity by themselves.

## Include checks for understanding (CFU)

These are activities like "whip around" and "response cards" that tell you whether students have learned what was expected. They are a crucial part of every lesson!

## Ask three key questions

1. What knowledge, skills and understanding do your students need to learn for this lesson?
2. What would be the best way to teach it?
3. How can I assess the knowledge and skills that were taught?

With these three questions, you can create your broad outline for the lesson and start getting into the details.

## Add cumulative reviews

Students constantly move between topics throughout the day, so it's important to jog their memories by briefly discussing what was covered in the prior lesson – you need them to remember the fundamentals before moving forward! Make it fun, quick and sharp – a quiz, writing on a mini-whiteboard, a competition etc.

## Add constraints for differentiation

Constraints are like in-built clues that help students complete tasks, such as filling in certain letters when trying to spell a word. You can give them lots of constraints at the start, and fewer and fewer as they practise and work through the activity.

## Cater to all learning styles

Ensure that your lessons cater to visual, auditory and kinaesthetic learners. You can refer to the board, have students collect items, act out dramas and more. Kids get bored, so try to spend less time talking and more time engaged in learning!

*Best Practices in Professional Learning and Teacher Preparation*  
 National Assoc For Gifted Children, Angela Novak, 2021-09-03. Several states offer additional teacher preparation programs by providing either an endorsement or certification in the field, but these are often pursued by teachers specifically enrolled in gifted coursework rather than in general education programs. Practitioners and researchers agree that time and energy should be spent on training teachers in how to address the needs of gifted and talented students both within the regular classroom and in specialized programs. This three-book series acknowledges this need and provides specific strategies for professional development in a variety of settings using various methods. Drawing on both literature in the field and research-based best practices in professional learning, this series provides the reader with a foundation for designing and implementing effective professional development experiences for educators working with gifted learners. This volume provides strategies and curricular materials/resources for working with gifted learners in specific content areas: i.e. mathematics, science, social studies, literacy, languages, and the arts. Discusses the importance of training teachers to use high-quality curriculum. Builds off of research on talent development, cultural awareness, and social justice in education. Details instructional strategies that are appropriate for challenging gifted learners, including developing growth mindset. A service publication of the National Association for Gifted Children, Washington, DC. This designation indicates that this book has been jointly developed with NAGC and that this book passes the highest standards of scholarship, research, and practice.
