READ ALOUD

Preparation time:
30–40 seconds

Time to read the text aloud: 30–40 seconds

Number of these tasks in each test: 6–7

In **Read aloud** tasks, you read a short text out loud. How well you can do this shows how well you understand the text.

- You will see instructions, a recording status box and a short text.
- You have 30–40 seconds to prepare. Then read the text aloud into the microphone.
- This task tests your Reading and Speaking skills (pronunciation, intonation, rhythm, stress, linking and fluency).

1. The timer shows the time left for all tasks in this part of the test.
2. Read the task instructions.
3. The recording status box tells you how much time you have left to prepare.
4. After 30–40 seconds, the recording status box changes to 'Recording'. You have another 30–40 seconds to read the text aloud. The recording status box then changes to 'Completed' and the recording stops.
5. Click 'Next' to go to the next task.

PTE Academic - Candidate Name

1. Look at the text below. In 40 seconds, you must read this text aloud as naturally and clearly as possible. You have 40 seconds to read aloud.

2. 3. 4. 40 The recording will start in 40 seconds.

5. Astronomers have recently discovered a large cloud of gas, in which many new stars are being formed, not far from our own solar system. While it would seem surprising that this phenomenon hadn't been previously noticed, the researchers explained that recent innovations in measuring the distance of gas clouds more accurately led to this discovery after earlier observations were reinterpreted.

Completed Next

Skills tested

➤ Reading

- Understanding overall meaning
- Understanding specific information and details
- Identifying a writer's purpose, style, tone or attitude
- Understanding academic vocabulary
- Reading a text under timed conditions

➤ Speaking

- Speaking fluently at a natural speed
- Using clear pronunciation
- Using appropriate intonation, stress, rhythm and linking
- Using a tone appropriate to the reason for speaking (e.g. to inform or to explain)

Points to remember: Speaking tasks

- You have a chance to **check your microphone** at the beginning. During all speaking tasks, keep your microphone the same distance from your mouth as it was during the microphone check. Speak at the same volume (not louder, not quieter).
- **Don't click 'Next' too soon.** Only move on to the next task when you are sure you are finished with the current one. You can't go back to these tasks to try again.

Teacher's tips

Remind test takers to speak at a normal volume throughout the test. PTE Academic microphones are sensitive to levels of speech and speaking loudly can distort sound and the ability of the computer to recognise what the test taker is saying. Speaking too loudly can in fact, affect the test takers score negatively.

Gracenin, 1981 The Routledge Handbook of Victorian Rebels Brenda Ayres, 2025-02-19 Although history records that the British nineteenth century was obsessed with order conventionality and conformity there were many Victorians from all walks of life across lines of class race and gender who resisted social mores and sometimes the laws themselves in a variety of ways and to varying degrees Some expressed dissension through music art literature and social protest Others were more subtle like manipulative wives who gained what they wanted while seemingly remaining docile and submissive Some rebellion fermented into social and political movements The revolt of still others was extremely executed by serial killers criminals and suicides Contemporary readers can learn from these rebels and discern what values and ways that were uniquely Victorian should be retained and those that should be rejected after having observed their outcomes To that end this collection of essays offers a study for both novice and expert on Victorian rebels

activities and beneficiary interactions that keep projects running And yet the impact of aid projects and indeed the impact of development itself often grows out of the daily activities and personal interactions of development practitioners This unique book considers challenges from the perspective of development practitioners who confront technical managerial political theoretical and moral quandaries on a daily basis With chapters written by expert practitioners on different aspects of design and management of international development activities this book examines real issues and navigates the often contradictory demands of local development needs including international donor imperatives limited financial resources time information and assurance of results the competing pulls of administrative efficiency and the desire to alleviate suffering It also gives readers access to the crucial but little heard voices of those who spend their professional lives designing and managing foreign aid projects offering insight into what did or did not work on projects they have managed implemented or evaluated These insights do not seek to identify universally right or wrong ways of doing development instead they highlight pros and cons associated with various approaches and decisions This book provides valuable insights for students and others interested in a development career encourages practitioners to engage in reflection and persuades researchers to further consider the influence of practice on project success or failure
