The primary purpose of this book is to trace the theoretical methodological foundations of American educational technology It must be emphasized that this work is essentially as history of the process of educational technology rather than of products in the form of devices or media Although media have played an important role in educational technology the reader should not lose sight of the central process which characterizes and underlies the true historical meaning and function of educational technology Moreover the assumption is made that all current theory methodology and practice rests upon the heritage of the past Indeed a common problem in the field has been the failure in many instances to take adequate account of past history in planning for the present or the future A related purpose of this book is to provide a selective survey of

research in educational technology as it relates to the American public schools Such research reviews are not intended to be comprehensive but were included because of their historical importance and their relevance in understanding the process of educational technology Monthly Catalog of United States Government Publications ,1990 *Texas Tech Journal of Education* Texas Tech University,1986 **Guide to Microcomputer Courseware for Bilingual Education** ,1985 The guide to courseware for computer assisted instruction and computer managed instruction in bilingual education English as a second language and second language instruction contains entries from the National Clearinghouse for Bilingual Education s database and selected courseware for the related areas of special education vocational education and adult basic education Each entry includes 1 the name title of the courseware program 2 the producer s name address and telephone number 3 computer hardware memory equipment requirements software specifications and courseware format 4 the language 5 the type of program or instructional technique 6 the content area 7 the grade or proficiency level and 8 a brief abstract with external evaluation if available The courseware is also indexed alphabetically by title content area and language MSE
