Teaching About Climate Change Cool Schools Tackle Global Warming:

Teaching about Climate Change Tim Grant, Gail Littlejohn, 2001 Making reductions in greenhouse gas emissions is a national focus in both the U S and Canada and schools are well placed to combine conservation strategies with an education program that makes links between lifestyle choices and the future of the planet This exciting resource provides educators at all grade levels with strategies to teach about global warming and engage students interest in doing their part to help cool the planet Compiled from the pages of North America s leading environmental education journal Green Teacher *Teaching About Climate Change* is packed with lesson plans activities experiments and worksheets From calculating your school s CO2 emissions and other greenhouse effect experiments to strategies for reducing school energy consumption and hands on explorations of energy and transportation alternatives from solar cookers to bikeathons this compendium provides the tools to get any classroom or community involved in making their school cool

Teaching Green - The High School Years Tim Grant, Gail Littlejohn, 2013-09-23 This resource is ideal for anyone working with young people in grades 9 12 whether in schools or in non formal educational settings Richly illustrated it offers fifty teaching strategies that promote learning about natural systems and foster critical thinking about environmental issues both local and global It contains new approaches to learning strategies for living sustainably and numerous activities that promote interdisciplinary learning In addition the book provides suggestions for how best to green individual subject areas develop integrated learning programs or replicate exemplary programs created by innovative schools and communities Containing contributions from over sixty educators from across North America the book s strength lies in its diverse content Readers learn how best to apply systems thinking teach about controversial issues and use a step by step approach to creative problem solving in environmental projects Also provided are instructions for measuring the ecological footprint of a high school creating an indoor living system that cleans water monitoring air quality with lichens and using green technologies to help green school campuses Many articles and activities engage teenagers in outdoor learning and community restoration projects Suggestions are included for connecting students with special needs to the environment around them Readers will find accessible background information and suggestions for many practical projects and activities It is sure to appeal to a wide range of teachers educators and parents seeking innovative ideas for incorporating green themes into their programs Tim Grant and Gail Littlejohn are the editors of Green Teacher magazine North America s award winning environmental teaching resource

Climate Change Revised Edition Shelley Tanaka, 2012-03-01 Revised and updated edition Scientists have been warning the world about global warming for almost three decades But the rest of us are only now starting to get the message The planet is warming at an unusually rapid rate and this warming is largely being caused by human activity Shrinking glaciers thawing permafrost erratic weather and threatened freshwater supplies are already affecting the lives of people around the globe and the worst is yet to come The crisis is real but there is little consensus about how to confront the problem not only because the science

is complex but because the economic political and social implications of taking action are vast far reaching and unsettling And despite the urgency climate change deniers seem to be more vocal than ever This revised and updated edition includes the most recent scientific findings while addressing the main issues What is happening and how did we get here What is the basic science behind climate change What is going to happen in the future And most important why is it so hard for us to accept what is going on and what can we do about it Charts maps a glossary an index and suggestions for further reading accompany the text Teaching Green Tim Grant,Gail Littlejohn,2004-03-01 A complete resource for teaching green to young people in grades 6 8 **Natural Resources, Sustainability and Humanity** Angela Mendonca,Ana Cunha,Ranjan Chakrabarti,2012-04-17 Shortly this book is the written up graded version of the topics discussed during the Small Meeting of the 2nd International School Congress Natural Resources Sustainability and Humanity held in Braga Portugal 5 8 May 2010 with the diverse participation of scientists educators and governmental representatives The Earth hosts an immense ecosystem colonized by millions of species for billions of years but only for a few tens of thousands of years by humans Environmental history tells though that it was humankind that shaped the environment as no other species History geography religion and politics among other reasons have differentiated populations with respect to access to safe food and water education health and to space and natural resource utilization The globalization era of trade information and communication is shortening distances and increasing overall wealth but as is pointed out in this book it is also contributing to the propagation of diseases and to the modification or even destruction of native ecosystems by exotic invasive species Man is the only species that has the perception of its history evolution of the consequences of its decisions and that there is a future ahead It is also the only species that has the potential to change it This awareness can be a source of anxiety and contradictory behaviours but it is also the key to changing attitudes towards the construction of a common sustainable home by committed education interdisciplinary approaches mobilization and empowerment of people and political consonant actions *Policy-Making in Education* Miriam Ben-Peretz,2009-04-16 This book is based on the notion that an adequate response to globalization challenges requires a holistic approach to several different dimensions immigration technology economy and environment as well as effective collaboration and coordination among the central domains of education curriculum teaching and teacher education Several cases of policy making are presented in order to elicit common features as guidelines for the holistic policy making model proposed in this book First this central framework views the different dimensions of globalization as requiring connection and integration Second the proposed approach asserts that three major aspects of education that are vital for policy in education curriculum teaching and teacher education must also be integrated Finally the process of policy making is perceived as requiring close interaction and coordination between diverse stakeholders and representatives of the different aspects of globalization The book presents a conceptual model for policy making as well as details of operational steps in this process **EcoKids** Dan Chiras,2005-06-01 To forge a sustainable

future we need citizens who care for the Earth We need citizens who understand that planet care is the ultimate form of self care But we also need generations who live according to their values and convictions and who can effect positive change in their lives and the lives of others Because public schools and the popular media cannot be counted on to produce an Earth friendly citizenry the task falls to parents Yet even aware parents often lack the understanding and resources to take on such a task EcoKids addresses this gap by presenting a coherent plan that will help parents foster love for nature teach children the importance of environmental protection and promote environmental values and inspire action actions that will last a lifetime A hopeful and inspiring guide for parents topics covered include ways to avoid gloom and doom in favor of positive solutions foster love and empathy for nature develop environmental values put values into action help children discover the roots of problems and be part of lasting solutions walk the talk counter the consumer culture starting in your own home and community generate hope and combat apathy Each chapter includes an inspiring case study of a child who s making a difference short pieces that highlight serious problems such as global warming along with positive solutions that can be read aloud to children and activities for children A resource guide lists helpful books articles videos and organizations

Humanizing Pedagogy Through HIV and AIDS Prevention American Association of Colleges for Teacher Education,2015-12-03 This book explores the power of educators to serve as HIV and AIDS prevention agents The definitive text represents the work of a distinguished panel of teacher educators and health scientists who identify core information and skills effective educators of HIV and AIDS prevention should learn as they are prepared to attend to the academic and human needs of students It assigns to teachers in the US and abroad the novel role of prevention agents given their extraordinary ability to access and affect young people to influence their behavior Humanizing Pedagogy considers the social economic racial gender and other variables that impact the prevention of HIV and AIDS The authors collectively assert that the process of preventing HIV and AIDS when it considers historic and social context can compel educators to serve not only as practitioners of knowledge but as community agents of health and well being Attending to HIV and AIDS issues advances the capacity and ability of educators to see and attend to the complete learner Humanizing Pedagogy is a single volume resource for educators in the US and abroad interested in attending to the whole needs of the learner and saving lives
