Consolidated Corporate Tax Base Dennis Weber, Jan van de Streek, 2016-04-24 In October 2016 the European Commission relaunched its plan to harmonize national income tax systems via the Common Consolidated Corporate Tax Base CCCTB perhaps the most ambitious reform of EU tax law ever attempted This timely book offers an early analysis of this important proposal and its implications covering issues such as the project's scope and main elements international considerations the relationship with OECD's base erosion and profit shifting BEPS initiative consolidation and anti abuse rules With carefully selected papers first presented at a January 2017 conference hosted by the Amsterdam Centre for Tax Law this volume focuses on such topics and issues as the following ways in which the proposed CCCTB is designed to preserve the competence of Member States to set their own tax rates reduction of the administrative burden for multinational companies incentives for research and development automatic cross border relief within the EU detailed analysis of the proposal's formula apportionment regime proposed new controlled foreign company CFC rules and interest limitation rule Because of the commitment of many Member States to keep their corporate income tax systems competitive on a stand alone basis the proposed CCCTB is enormously controversial This book provides authoritative insights into problems likely to arise and discusses the prospects of how the proposal is likely to be implemented Thus this book proves to be of immeasurable value to taxation policymakers practitioners and academics

**Tax Treaties: Building Bridges between Law and Economics**, 2010 In this book experts from the field of economics take a different view of tax treaty issues than experts from the field of law In order to encourage the much needed communication between these two groups a cross disciplinary conference was held to discuss selected tax treaty issues from both a legal and

economic perspective Twenty five conference papers on eight topics were prepared by lawyers and economists The papers on legal issues were presented and discussed by economists and vice versa The interdisciplinary focus of the conference not only allowed an exchange of knowledge between two groups who think differently about similar issues but also made it possible to better grasp the impact of the thinking of one group on the areas of interest to the other group The outcome of the conference is reflected in this book By showing the legal and the economic approaches to an issue this book improves the general understanding of the two disciplines and demonstrates how the decisions in one discipline may influence the other discipline and its concepts Twenty two contributions are included written by the most distinguished academics practitioners and representatives of several international tax administrations and both tax and economic institutions

**Reforming Tax Systems** Vahram Stepanyan, 2003-09-01 Starting in the early 1990s the Baltics Russia and other BRO countries of the former Soviet Union initiated tax reforms that varied widely at the later stages Recently some of the BRO countries basing decisions on the proposition that lowering of the top marginal income tax rate would significantly benefit economic development and increase tax compliance have initiated a new stage of tax reforms This paper reviews country experiences and suggests that i overall there seems to be little evidence of a substantial improvement in income tax revenues resulting simply from a reduction in the top marginal tax rates and ii in the BRO countries the elasticity of the behavior of economic agents in terms of labor supply saving and investment with respect to income tax rates is not large and a reduction of the existing income tax rates is unlikely to lead to a notable expansion of economic activity
