Alexander Poznansky is the first Western scholar to have gained access to the Tchaikovsky archives in Klin Russia. He provides much hitherto unknown documentary material: memoirs, diary entries, letters, and newspaper reports, and adds his own commentary on the status of homosexuality in nineteenth-century Russia and on the various conspiracy theories that have been advanced to account for Tchaikovsky's death. His conclusion is that there is no factual evidence to support the notion that Tchaikovsky's death was caused by anything other than cholera.
