Syntactic Analysis and Description David Lockwood,2005-12-07 This book is designed to teach

undergraduate and beginning graduate students how to understand analyse and describe syntactic phenomena in different languages The book covers every aspect of syntax from the basics to more specialised topics such as clitics which have grammatical importance but cannot be used in isolation and negation in which a construction contradicts the meaning of a sentence The approach taken combines concepts from different theoretical schools which view syntax differently These include M A K Halliday s systemic functional linguistics the stratificational school advocated by Sydney Lamb and Kenneth L Pike s tagmemic model The emphasis of the book is on syntactic structures rather than linguistic meaning and the book stresses the difference between a well formed sentence and a meaningful one The final chapter brings these two aspects together to show the connections between syntax and semology Each chapter concludes with exercises from a diverse range of languages and a list of major technical terms The book also includes a glossary as an essential resource for students approaching this difficult subject for the first time

one's experiences of spoken and written words have contributed to their ongoing relationship with language and literacy. Transnational Literacy Autobiographies as Translingual Writing is a cutting edge study of this engaging genre of writing in academic and professional contexts. In this state of the art collection, Suresh Canagarajah brings together 11 samples of writing by students that both document their literary journeys and pinpoint the seminal works affecting their development as translingual readers and writers. Integrating the narrative of the author which is written as his own literacy autobiography with a close analysis of these texts, this book presents a case for the literacy autobiography as an archetypal genre that prepares writers for the conventions and processes required in other genres of writing, demonstrates the serious epistemological and rhetorical implications behind the genre of literacy autobiography among migrant scholars and students, effectively translates theoretical publications on language diversity for classroom purposes, providing a transferable teaching approach to translingual writing, analyzes the tropes of transnational writers and their craft in meshing translingual resources in their writing, demonstrates how transnationalism and translingualism are interconnected, guiding readers toward an understanding of codemeshing not as a cosmetic addition to texts but motivated toward resolving inescapable personal and social dilemmas. Written and edited by one of the most highly regarded linguists of his generation, this book is key reading for scholars and students of applied linguistics, TESOL and literacy studies, as well as tutors of writing and composition worldwide.
