Ssr 97 Symposium On Software Reusability Software Engineering Notes:

Proceedings of the 1997 Symposium on Software Reusability Association for Computing Machinery, 1997 **Software Architecture** Patrick Donohoe, 1999-02-28 Software architecture is a primary factor in the creation and evolution of virtually all products involving software. It is a topic of major interest in the research community where numerous formalisms, processes, and technologies are under development. Architecture is also of major interest in industry because it is recognized as a significant leverage point for manipulating such basic development factors as cost, quality, and interval. Its importance is attested to by the fact that there are several international workshop series as well as major conference sessions devoted to it. The First Working IFIP Conference on Software Architecture WICSAI provided a focused and dedicated forum for the international software architecture community to unify and coordinate its effort to advance the state of practice and research. WICSA 1 was organized to facilitate information exchange between practising software architects and software architecture researchers. The conference was held in San Antonio, Texas, USA, from February 22nd to February 24th, 1999. It was the initiating event for the new IFIP TC 2 Working Group on Software Architecture. This proceedings document contains the papers accepted for the conference. The papers in this volume comprise both experience reports and technical papers. The proceedings reflect the structure of the conference and are divided into six sections corresponding to the working groups established for the conference. *Empirical Software Engineering Issues. Critical Assessment and Future Directions* Victor Basili, Dieter Rombach, Kurt Schneider, Barbara Kitchenham, Dietmar Pfahl, Richard Selby, 2007-06-11 This book constitutes the thoroughly refereed post-proceedings of the International Dagstuhl Seminar on Empirical Software Engineering held in Dagstuhl Castle, Germany, in June 2006. The 54 revised full papers in this state-of-the-art survey are organized in topical sections on the empirical paradigm, measurement, and model building, technology transfer, and education, as well as roadmapping. *Product Focused Software Process Improvement* Frank Bomarius, Seija Komi-Sirviö, 2003-06-30 The Third International Conference on Product Focused Software Process Improvement PROFES 2001 continued the success of the PROFES 99 and PROFES 2000 conferences. PROFES 2001 was organized in Kaiserslautern, Germany, September 10-13, 2001. The PROFES conference has its roots in the PROFES Esprit project (<http://www.ele.vtt.fi/profes>), but it quickly evolved into a full-fledged general purpose conference in 1999, and since then it has gained wide spread international popularity. As in previous years, the main theme of PROFES 2001 was professional software process improvement (SPI), motivated by product and service quality needs. SPI is facilitated by software process assessment, software measurement, process modeling, and technology transfer, and has become a practical tool for quality software engineering and management. The conference addresses both the solutions found in practice as well as relevant research results from academia. The purpose of the conference is to bring to light the most recent findings and results in the area and to stimulate discussion between the researchers, experienced professionals, and technology providers for SPI. **Software Engineering - ESEC-FSE '97** Mehdi Jazayeri, Helmut

Schauer,1997-09-10 This book constitutes the refereed proceedings of the 6th European Conference on Software Engineering FSE 97 held jointly with the 5th ACM SIGSOFT Symposium on the Foundations of Software Engineering FSE 97 in Zurich Switzerland in September 1997 The volume presents 27 revised full papers selected from a total of 194 submissions Also included are six invited presentations All in all the volume is a unique presentation of state of the art research and development in software engineering The papers are organized in topical sections on software engineering education software architecture processes configuration and process tools formal analysis empirical studies system modelling testing program analysis and decomposition and distribution Learning Software Organizations. Methodology and Applications

Günther Ruhe, Frank Bomarius, 2000-11-29 This book constitutes the thoroughly refereed and revised post conference documentation of the 11th International Conference on Software Engineering and Knowledge Engineering SEKE 99 held in Kaiserslautern Germany in June 1999 The book provides a unique overview of current activities approaches and trends in learning software organizations The first part gives an overview on the topic covering foundations in the software engineering domain enabling techniques for organizational learning and learning support techniques The second and the third part of the book on methodology and applications present thoroughly revised full papers of the most interesting papers on learning software organizations presented during SEKE 99 and its satellite workshop LSO 99 *Software Design and Development: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources, 2013-07-31 Innovative tools and techniques for the development and design of software systems are essential to the problem solving and planning of software solutions Software Design and Development Concepts Methodologies Tools and Applications brings together the best practices of theory and implementation in the development of software systems This reference source is essential for researchers engineers practitioners and scholars seeking the latest knowledge on the techniques applications and methodologies for the design and development of software systems **Effective Software Maintenance and**
