Stalled Democracy:

Stalled Democracy Eva Rana Bellin, 2002 This ambitious book examines the dynamics of democratization in Tunisia and other late developing countries where the process has stalled **Faith in Moderation** Jillian Schwedler, 2006-06-19 Does political inclusion produce ideological moderation Schwedler argues that examining political behaviour alone provides insufficient evidence of moderation because it leaves open the possibility that political actors might act as if they are moderate while harbouring radical agendas Through a comparative study of the Islamic Action Front party in Jordan and the Islah party in Yemen she argues that the IAF in Jordan has become more moderate through participation in pluralist political processes while the Islah party has not The variation is explained in part by internal group organization and decision making processes but particularly by the ways in which the IAF has been able to justify its new pluralist practices on Islamic terms while the Islah party has not Based on nearly four years of field research in Jordan and Yemen Schwedler contributes both an important theory of ideological moderation and detail about these powerful Islamist political parties **Accepting**

Authoritarianism Teresa Wright, 2010-03-08 Why hasn't the emergence of capitalism led China's citizenry to press for liberal democratic change This book argues that China's combination of state led development late industrialization and socialist legacies have affected popular perceptions of socioeconomic mobility economic dependence on the state and political options giving citizens incentives to perpetuate the political status quo and disincentives to embrace liberal democratic change Wright addresses the ways in which China's political and economic development shares broader features of state led late industrialization and post socialist transformation with countries as diverse as Mexico India Tunisia Indonesia South Korea Brazil Russia and Vietnam With its detailed analysis of China's major socioeconomic groups private entrepreneurs state sector workers private sector workers professionals and students and farmers Accepting Authoritarianism is an up to date comprehensive and coherent text on the evolution of state society relations in reform era China

Weapons of the Wealthy Scott B. Radnitz, 2012-07-12 Mass mobilization is among the most dramatic and inspiring forces for political change When ordinary citizens take to the streets in large numbers they can undermine and even topple undemocratic governments as the recent wave of peaceful uprisings in several postcommunist states has shown However investigation into how protests are organized can sometimes reveal that the origins and purpose of people power are not as they appear on the surface In particular protest can be used as an instrument of elite actors to advance their own interests rather than those of the masses Weapons of the Wealthy focuses on the region of post Soviet Central Asia to investigate the causes of elite led protest In nondemocratic states economic and political opportunities can give rise to elites who are independent of the regime yet vulnerable to expropriation and harassment from above In conditions of political uncertainty elites have an incentive to cultivate support in local communities which elites can then wield as a weapon against a predatory regime Scott Radnitz builds on his in depth fieldwork and analysis of the spatial distribution of protests to

demonstrate how Kyrgyzstan's post independence development laid the groundwork for elite led mobilization whereas Uzbekistan's did not. Elites often have the wherewithal and the motivation to trigger protests as is borne out by Radnitz's more than one hundred interviews with those who participated in observed or avoided protests. Even Kyrgyzstan's 2005 Tulip Revolution which brought about the first peaceful change of power in Central Asia since independence should be understood as a strategic action of elites rather than as an expression of the popular will. This interpretation helps account for the undemocratic nature of the successor government and the 2010 uprising that toppled it. It also serves as a warning for scholars to look critically at bottom up political change.

The State of Civil Society in Japan Frank J. Schwartz, Susan J. Pharr, 2003-10-20 Table of contents

Challenging The Third Sector Sue Kenny, Marilyn Taylor, Jenny Onyx, Marjorie Mayo, 2016-06-01 This is the first book to explore the different relationships between active citizenship and civil society particularly the third sector within civil society. In what ways can the third sector nurture active citizenship? How have the third sector and active citizenship been constructed and reconstructed both locally and internationally over recent years? To what extent have new kinds of social connectedness changing forms of political engagement and increasingly complex social and environmental problems influenced civil society action? Written by experts in the field this important book draws on a range of theory and empirical studies to explore these questions in different socio political contexts and will be a useful resource for academics and students as well as practitioners.

The Decline of Nation-States after the Arab Spring Imad Salamey, 2016-10-14 Surveying the causes of the Arab Spring and revealing the governing trends arising from it this book examines various international relation theories through the lens of the experiences of the countries in the Middle East and North Africa region. It takes the events of the Arab Spring as an outcome of globalization's double movement whose integrative cultural political and security frameworks devastated nationally controlled economies undermining the nation state system and propagating a decentralized and communitarian based governance structure. The consequences for many plural diverse societies were two fold: autocratic nationalism was discarded while decentralized regimes representing communitarian based politics came to the fore. The author reveals how the formulation of a new communitocratic order rests on the accommodation of this newly emerging communitarianism and explores the major drivers of political transformation describing the emerging communities forecasting their governing options and the possible repercussions for the post Arab Spring states.

The Government and Politics of the Middle East and North Africa Mark Gasiorowski, 2016-08-02 A comprehensive country by country examination of the history domestic politics and foreign policies of the Middle East and North Africa.

The Force of Obedience Beatrice Hibou, 2011-06-27 The events that took place in Tunisia in January 2011 were the spark igniting the uprisings that swept across North Africa and the Middle East toppling dictators and leading to violent conflict and tense stand offs. What was it about this small country in North Africa that enabled it to play this exceptional role? This book is a deeply informed account of the exercise of power in Tunisia in the run up to the revolt that

forced its authoritarian ruler Ben Ali into exile It analyses the practices of domination and repression that were pervasive features of everyday life in Tunisia showing how the debt economy and the systems of social solidarity and welfare created forms of subjection and mutual dependence between rulers and ruled enabling the reader to understand how a powerful protest movement could develop despite tight control by police and party For those wishing to understand the extraordinary events unfolding across the Arab world this rich subtle and insightful book is the indispensable starting point Human Rights, Power and Civic Action Bård A. Andreassen, Gordon Crawford, 2013-07-18 Human Rights Power and Civic Action examines the interrelationship between struggles for human rights and the dynamics of power focusing on situations of poverty and oppression in developing countries It is argued that the concept of power is a relatively neglected one in the study of rights based approaches to development especially the ways in which structures and relations of power can limit human rights advocacy Therefore this book focuses on how local and national struggles for rights have been constrained by power relations and structural inequalities as well as the extent to which civic action has been able to challenge alter or transform such power structures and simultaneously to enhance protection of people s basic human rights Contributors examine and compare struggles to advance human rights by non governmental actors in Cambodia China Ghana Kenya South Africa and Zimbabwe The country case studies analyse structures of power responsible for the negation and denial of human rights as well as how rights promoting organisations challenge such structures Utilising a comparative approach the book provides empirically grounded studies leading to new theoretical understanding of the interrelationships between human rights struggles power and poverty reduction Human Rights Power and Civic Action will be of interest to students and scholars of human rights politics power development and governance
