E. Wang,Joe Kraynak,1991 Tells how to make sense of computer ads recognize the hidden costs in computer purchases keep a computer in working order and choose software *Understanding Data Communications* Gilbert Held,1991 Who This Book Is For This book was written as a

comprehensive guide to the evolution and modern development associated with the various facts of the field of data communications. As such, this book can be used as a textbook both by students and professionals. Each chapter includes a quiz to test your knowledge and the answers to questions are contained at the back of this book. This book's approach to data communications: The modern society we live in today is a communications-oriented society. Thus, the goal of this book is to assist readers in understanding how this society operates by examining the basic structure of the field of data communications. This book explains how different communications devices operate, describes the different types of transmission facilities used to transport information, and examines such emerging technologies as digital subscriber lines and cable modems that might revolutionize the manner by which we work. For readers who surf the Web with conventional modems, imagine being able to transmit and receive data at a speed several orders of magnitude beyond what we now do. The possibilities for new applications become almost endless. Soon we will be able to visit museums and join virtual lectures on the style of different artists, and we'll be able to zoom in to see minute details that might previously have required a trip around the world. Soon we will be able to talk and view our parents, business associates, or pen pals located hundreds or thousands of miles away as if they were in our living rooms or offices, and we will do so not only on our home computer but on our cell phone. So join me in examining the field of data communications as we explore its evolution and the technical aspects of equipment and transmission facilities that make the wonderful world of data communications a reality.
