Design of Welded Tubular Connections P.W. Marshall, 2013-10-22 Although tubular structures are reasonably well understood by designers of offshore platforms onshore applications often suffer from learning curve problems particularly in the connections tending to inhibit the wider use of tubes This book was written primarily to help this situation Representing 25 years of work by one of the pioneers in the field of tubular structures the book covers research synthesis of design criteria and successful application to the practical design construction inspection and lifetime monitoring of major structures Written by the principal author of the AWS D1 1 Code Provisions for Tubular Structures this book is intended to be used in conjunction with the AWS Structural Welding Code Steel AWS D1 1 88 published by the American Welding Society Miami FL USA Users of this Code writers of other codes students and researchers alike will find it an indispensable source of background material in their work with tubular structures

Cold-Formed Steel Design Wei-Wen Yu, Roger A. LaBoube, Helen Chen, 2019-10-04 Provides the latest AISI North American specifications for cold formed steel design Hailed by professionals around the world as the definitive text on the design of cold formed steel this book provides descriptions of the construction and structural behavior of cold formed steel members and connections from both theoretical and experimental points of view Updated to reflect the 2016 AISI North American specification and 2015 North American framing standards this all new fifth edition offers readers a better understanding of the analysis and design of the thin walled cold formed steel structures that have been widely used in building construction and other areas in recent years Cold Formed Steel Design 5th Edition has been revised and reorganized to incorporate the Direct Strength Method It discusses the reasons and justification for the various design provisions of the North American specification and framing design standards It provides chapter coverage of the types of steels and their most important mechanical properties the fundamentals of buckling modes commonly used terms the design of flexural members compression members and closed cylindrical tubes and of beam columns using ASD LRFD and LSD methods shear diaphragms and shell roof structures standard corrugated sheets and more Updated to the 2016 North American AISI S100 design specification and 2015 North American AISI S240 design standard Offers thorough coverage of

ASD LRFD LSD and DSM design methods Integrates DSM in the main body of design provisions Features a new section on Power Actuated Fastener PAF Connections Provides new examples and explanations of design provisions Cold Formed Steel Design 5th Edition is not only instructive for students but can serve as a major source of reference for structural engineers researchers architects and construction managers

Steel Structures Charles G. Salmon, John Edwin Johnson, Faris Amin Malhas, 2009 The design of structural steel members has developed over the past century from a simple approach involving a few basic properties of steel and elementary mathematics to a more sophisticated treatment demanding a thorough knowledge of structural and material behavior Steel Structures Design and Behavior 5 e strives to present in a logical manner the theoretical background needed for developing and explaining design requirements Beginning with coverage of background material including references to pertinent research the development of specific formulas used in the AISC Specifications is followed by a generous number of design examples explaining in detail the process of selecting minimum weight members to satisfy given conditions

Welding of Tubular Structures Yong Zhou, 2016-01-21 Welding of Tubular Structures focuses on the testing techniques and other processes connected with welding tubular structures in different conditions and environments The selection features the works of individuals who have devoted time in the study of welding particularly on tubular structures and other materials The discussions focus on the design of connections of welded structures including the process of welding and inspection Attention is given to weldments on offshore structures and primary concerns include the testing of the materials used and how these materials fall short if subjected to stress and fatigue Different welding techniques used on offshore structures are also discussed Welding techniques on other materials are also noted These discussions are supported by studies that are backed up by numerical representations which is aimed at validating the strength of welded materials Consideration is given when these welded materials suffer from crack or fatigue Analysis of the factors why these welded materials fail to meet standards is done A comparative study is also conducted on aluminum steel and other products when these are subjected to stress in different conditions and environments The book is a primary source of data to those in the welding sector particularly those working in offshore structures
