Frontiers in Turbulence and Coherent Structures Jim Denier, 2007 This book is based on the proceedings of the COSNet CSIRO Workshop on Turbulence and Coherent Structures held at the Australian National University in Canberra in January 2006 It codifies recent developments in our understanding of the dynamics and statistical dynamics of turbulence and coherent structures in fluid mechanics atmospheric and oceanic dynamics plasma physics and dynamical systems theory It brings together articles by internationally acclaimed researchers from around the world including Dijkstra Utrecht Holmes Princeton Jimenez UPM and Stanford Krommes Princeton McComb Edinburgh Chong Melbourne Dewar ANU Watmuff RMIT and Frederiksen CSIRO The book will prove a useful resource for researchers as well as providing an excellent reference for graduate students working in this frontier area

Models for Tropical Climate Dynamics Boualem Khouider, 2019-07-03 This book is a survey of the research work done by the author over the last 15 years in collaboration with various eminent mathematicians and climate scientists on the subject of tropical convection and convectively coupled waves In the areas of climate modelling and climate change science tropical dynamics and tropical rainfall are among the biggest uncertainties of future projections This not only puts at risk billions of human beings who populate the tropical continents but it is also of central importance for climate predictions on the global scale This book aims to introduce the non expert readers in mathematics and theoretical physics to this fascinating topic in order to attract interest into this difficult and exciting research area The general theme revolves around the use of new deterministic and stochastic multi cloud models for tropical convection and convectively coupled waves It draws modelling ideas from various areas of mathematics and physics and used in conjunction with state of the art satellite and in situ observations and detailed numerical simulations After a review of preliminary material on tropical dynamics and moist thermodynamics including recent discoveries based on satellite observations as well as Markov chains the book immerses the reader into the area of models for convection and tropical waves It begins with basic concepts of linear stability analysis and ends with the use of these models to improve the state of the art global climate models The book also contains a fair amount of exercises that makes it suitable as a textbook complement on the subject

Completing the Forecast National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee on Estimating and Communicating Uncertainty in Weather and Climate Forecasts, 2006-10-09 Uncertainty is a fundamental characteristic of weather seasonal climate and hydrological prediction and no forecast is

complete without a description of its uncertainty Effective communication of uncertainty helps people better understand the likelihood of a particular event and improves their ability to make decisions based on the forecast Nonetheless for decades users of these forecasts have been conditioned to receive incomplete information about uncertainty They have become used to single valued deterministic forecasts e g the high temperature will be 70 degrees Fahrenheit 9 days from now and applied their own experience in determining how much confidence to place in the forecast Most forecast products from the public and private sectors including those from the National Oceanographic and Atmospheric Administration s National Weather Service continue this deterministic legacy Fortunately the National Weather Service and others in the prediction community have recognized the need to view uncertainty as a fundamental part of forecasts By partnering with other segments of the community to understand user needs generate relevant and rich informational products and utilize effective communication vehicles the National Weather Service can take a leading role in the transition to widespread effective incorporation of uncertainty information into predictions Completing the Forecast makes recommendations to the National Weather Service and the broader prediction community on how to make this transition Scientific and Technical Aerospace Reports ,1995
