Terminal Choices Euthanasia Suicide And The Right To Die:

Terminal Choices Robert N. Wennberg, 1989 A discussion of the moral religious legal and personal issues surrounding euthanasia suicide and the right to die **Voluntary Euthanasia and the Common Law** Margaret Otlowksi, 1997

Margaret Otlowski investigates the complex and controversial issue of active voluntary euthanasia She critically examines the criminal law prohibition of medically administered active voluntary euthanasia in common law jurisdictions and carefully looks at the situation as handled in practice The evidence of patient demands for active euthanasia and the willingness of some doctors to respond to patients requests is explored and an argument for reform of the law is made with reference to the position in the Netherlands where active voluntary euthanasia is now openly practiced **Assisted Death in Europe and**

America Guenter Lewy, 2011 Advances in medical treatment now enable physicians to prolong life to a previously unknown extent however in many instances these new techniques mean not the saving of life but prolonging the act of dying In the eyes of many medical technology has run out of control and contributes to unnecessary suffering Hence the demand has arisen that patients should be entitled to choose death when pain and physical and mental deterioration have destroyed the possibility of a dignified and meaningful life and that their doctors should help them to realize this endeavor At the present time there are seven jurisdictions in the world that with various restrictions have legalized the practice of assisted death physician assisted suicide and or voluntary euthanasia to wit the Netherlands Belgium Luxembourg Switzerland in Europe and the states of Oregon Washington and Montana in the United States Four of these regimes in the Netherlands Belgium Switzerland and the state of Oregon have been functioning for many years and we have for them a substantial body of data as well as much observational research This book is based upon this material The literature dealing with the moral legal and social aspects of assisted death is voluminous but there is a paucity of writing that provides a detailed account of the way these four regimes are actually working Many partisans on both sides of the issue cite existing data selectively or at times willfully distort the empirical evidence in order to strengthen their case Based on the documentary record and interviews with officials and scholars this book seeks to give the specialist as well as the general interested reader a reliable picture of the way assisted death functions and to draw relevant lessons While accurate factual information cannot settle a moral debate it nevertheless is a precondition of any well founded argument The author speaks authoritatively about the issues he addresses I think this book does make an important contribution to the field It will be of interest to students and scholars of PAS as a source of information and reference I definitely recommend publication Stuart Youngner Department of Bioethics Case Western Reserve University School of Medicine The information collected here makes an important contribution to the literature on PAS because it collects a broad array of relevant information into a single volume It is interesting and enlightening This will make the book a valuable resource for anyone interested in the subject and an especially useful resource for academics who study or teach about the issues Rosamond Rhodes Director Bioethics Education Mt Sinai School

Write to Death Elizabeth A. Gailey, 2003-09-30 Has the mainstream media been careless in reporting on the issue of euthanasia As the Right to Die and Physician Assisted Suicide movements gather steam the national media have been too quick to perpetuate and focus on the medical and legal overtones of death The ethical religious and philosophical dimensions of our increased acceptance of euthanizing the aged infirm and disabled are often neglected Gailey argues that the press s failure to enrich public discourse may well erode its trustworthiness in the public s eye Using abundant examples from analysis of elite mainstream news publications Gailey details how the national press systematically advanced pro euthanasia views and interpretations while marginalizing or omitting pro life perspectives and frames The battle over legalizing passive and active euthanasia has enormous social economic and ethical implications An understanding of how the news media frame or package such issues for public consumption is critical Gailey s integrative approach combines an exploration of the major historical ideational and economic factors leading to the rise of the Right to Die movement and includes in depth analysis of the media s framing of the controversy in the two decades Karen Ann Quinlan s coma in 1975 to Dr Jack Kevorkian s 1999 conviction

Making Medical Decisions for the Profoundly Mentally Disabled Norman L. Cantor, 2009-08-21 A legal and moral analysis of medical decision making on behalf of those with such severe cognitive impairments that they cannot exercise self determination In this book Norman Cantor analyzes the legal and moral status of people with profound mental disabilities those with extreme cognitive impairments that prevent their exercise of medical self determination He proposes a legal and moral framework for surrogate medical decision making on their behalf The issues Cantor explores will be of interest to professionals in law medicine psychology philosophy and ethics as well as to parents guardians and health care providers who face perplexing issues in the context of surrogate medical decision making The profoundly mentally disabled are thought by some moral philosophers to lack the minimum cognitive ability for personhood Countering this position Cantor advances both theoretical and practical arguments for according them

full legal and moral status He also argues that the concept of intrinsic human dignity should have an integral role in shaping the bounds of surrogate decision making Thus he claims while profoundly mentally disabled persons are not entitled to make their own medical decisions respect for intrinsic human dignity dictates their right to have a conscientious surrogate make medical decisions on their behalf Cantor discusses the criteria that bind such surrogates He asserts contrary to popular wisdom that the best interests of the disabled person are not always the determinative standard the interests of family or others can sometimes be considered Surrogates may even consistent with the intrinsic human dignity standard sometimes authorize tissue donation or participation in nontherapeutic medical research by profoundly disabled persons Intrinsic human dignity limits the occasions for such decisions and dictates close attention to the preferences and feelings of the profoundly disabled persons themselves Cantor also analyzes the underlying philosophical rationale that makes these decision making criteria consistent with law and morals

[The Fall and Sin](#) Marguerite Shuster, 2004 The devastating evils of recent history have brought about renewed interest in the Christian doctrine of sin This volume explores with fresh insight and great seriousness the contemporary plausibility meaning and relevance of the biblical understanding of the Fall and its effects Marguerite Shuster argues that certain aspects of the traditional doctrine of the Fall including the belief that it took place in time and space cannot simply be set aside without serious consequences for our doctrine of God

and our understanding of human identity dignity and responsibility She explores the nature and extent of sin and examines such problematic issues as degrees of sin and culpability Despite the seriousness with which Shuster treats these topics her discussion is not despairing but instead points to the redemption that God has accomplished in Christ Filled with contemporary allusions and completed with model sermons on the Fall and sin this volume is one of the best available studies of this key Christian doctrine
