

Matter Has Mass

- All matter has mass
- Mass is the amount of matter something is made of
- The only time an object's mass will change is if the amount of matter in the object changes.

The Difference Between Mass and Weight

- Weight is different from mass
- Gravity is a force of attraction between objects based on their masses
- Every object has a gravitational force. This keeps everything on Earth from floating into space. (The bigger the mass, the greater the gravitational force)
- Weight measures how much gravitational force is being put on an object

Measuring Mass and Weight

Mass and Weight are Different	
MASS	WEIGHT
• Mass is the amount of matter in an object	• Weight is a measure of the gravitational force on an object
• Mass always stays the same no matter where on Earth the object is	• Weight changes. It depends on where the object is on Earth
