*Homosexuality and the Crisis of Anglicanism* William L. Sachs,2009-08-13 The Anglican conflict over homosexuality has

drawn worldwide interest and divided the church However conflict within Christianity is not new This book traces the steps by which the crisis emerged and reveals the deeper debates within the church which underlie both the current controversy and much earlier splits William L Sachs contends that the present debate did not begin with opposition to homosexuality or in advocacy of it He argues that like past tensions it originates in the diverging local contexts in which the faith is practised and their differing interpretations of authority and communion In the aftermath of colonialism activists and reformers have taken on prominent roles for and against the status quo The crisis reveals a Church in search of a new global consensus about the appropriate forms of belief and mission

**International Cooperation Against All Odds** Mai'a K. Davis Cross,2023-10-19 International Cooperation Against All Odds The Ultrasocial World recasts how we understand international relations through an examination of how the human evolutionary predisposition to be ultrasocial as a species impacts which political ideas succeed transform manipulate and inspire on a global scale At a time when pessimism about our current world order is at an all time high this book overturns widespread assumptions that international relations is mainly about conflict power and national self interest In the last 10 20 years scientists have discovered that as a species we are biologically hard wired soft wired and pre wired to be other regarding and cooperative Humans are an ultrasocial species and yet this predisposition is completely ignored in governments across the world Political leaders experts and the media have cultivated a myopic vision of global conflict feeding an obsession on crises of the moment rather than recognizing frequent and significant breakthroughs in peaceful cooperation and overall trends in the decline of violence This book shows how time and time again our ultrasocial predisposition has pushed us towards big ideas that inspire and bring us together around the power of possibility Featuring original research on international cooperation in outer space exploration European Union integration nuclear weapons and climate change among other examples Mai a K Davis Cross shows ultrasociality at work in a range of contexts Tracing the path from social neuroscience and evolutionary biology among others to the power of ideas to international agreements International Cooperation Against All Odds opens up an entirely new understanding of world politics If we recognize our nature as a species and the potential we have to work together we can start to transform institutions and devise policies that take advantage of this The book ends with a roadmap to promote more international cooperation and eventually a more stable peaceful world order
