Learning Science Outside the Classroom

The Company of the Classroom

**Learning Science Outside the Classroo Martin Braund, Michael Reiss, 2012-12-06 This book shows how a wide range of contexts for learning science can be used outside of the classroom and includes learning at museums science centres and planetaria from newspapers magazines and through ICT at industrial sites and through science trails at zoos farms botanic gardens residential centres and freshwater habitats in school grounds With contributions from well known and respected practitioners in all fields of science education

and through using case studies Learning Science Outside the Classroom offers practical guidance for teachers assistant teaching staff and student teachers involved in primary and secondary education It will help enable them to widen the scientific experience and understanding of pupils The advice in this book has been checked for safety by CLEAPSS **BSCS** Science T.R.A.C.S.: Investigating ecosystems, 1999 Four modules explore topics in physical science earth and space science life science and science and technology with hands on activities designed to engage students in the processes of scientific inquiry and technological design Modules within a developmental level may be taught in any sequence Shine Linda Froschauer, Mary L. Bigelow, 2012 Rise and Shine provides a friendly support system that new science teachers can turn to in their first days months and even years in the classroom This easy to read book offers plenty of helpful techniques for managing the classroom maintaining discipline and dealing with parents But it also covers important topics unique to science teaching such as setting up a laboratory keeping the classroom safe and initiating inquiry from the first day Sprinkled throughout the book is candid advice from seasoned science teachers who offer both useful strategies and warm reassurance Rise and Shine is designed to help preservice teachers those in the first few years of teaching regardless of grade level and those who may be entering a new situation within the teaching field If you need a mentor or if you are a mentor or instructor who wants to support beginning science teachers this book is for you ENC Focus .2001

Conservation Education and Outreach Techniques Susan Kay Jacobson, Mallory D. McDuff, Martha C. Monroe, 2015 The conservation of biological diversity depends on people's knowledge and actions This book presents the theory and practice for creating effective education and outreach programmes for conservation The authors describe an exciting array of techniques for enhancing school resources marketing environmental messages using social media developing partnerships for conservation and designing on site programmes for parks and community centres Vivid case studies from around the world illustrate techniques and describe planning implementation and evaluation procedures enabling readers to implement their own new ideas effectively Conservation Education and Outreach Techniques now in its second edition and updated throughout includes twelve chapters illustrated with numerous photographs showing education and outreach programmes in action each incorporating an extensive bibliography Helpful text boxes provide practical tips guidelines and recommendations for further exploration of the chapter topics This book will be particularly relevant to conservation scientists resource managers environmental educators students and citizen activists It will also serve as a handy reference and a comprehensive text for a variety of natural resource and environmental professionals Darwin-Inspired Learning Carolyn J. Boulter, Michael J. Reiss, Dawn L. Sanders, 2015-01-19 Charles Darwin has been extensively analysed and written about as a scientist Victorian father and husband However this is the first book to present a carefully thought out pedagogical approach to learning that is centered on Darwin's life and scientific practice. The ways in which Darwin developed his scientific ideas and their far reaching effects continue to challenge and provoke contemporary teachers and

learners inspiring them to consider both how scientists work and how individual humans read nature Darwin inspired learning as proposed in this international collection of essays is an enquiry based pedagogy that takes the professional practice of Charles Darwin as its source Without seeking to idealise the man Darwin inspired learning places importance on active learning hands on enquiry critical thinking creativity argumentation interdisciplinarity In an increasingly urbanised world first hand observations of living plants and animals are becoming rarer Indeed some commentators suggest that such encounters are under threat and children are living in a time of nature deficit Darwin inspired learning with its focus on close observation and hands on enquiry seeks to re engage children and young people with the living world through critical and creative thinking modeled on Darwin's life and science
