**The Tentaculites of Bohemia** Bedřich Bouček, 1964 První monografická zpracování tentakulit eského siluru a devonu Do obecního stažení zařazuje historický pohled vzhledem k zkoumání materiálu a metody zpracování morfologie a ontologických znaků V popisném stažení probírá všechny známé druhy *The Tentaculites of Bohemia; Their Morphology, Taxonomy, Ecology, Phylogeny and Biostratigraphy. Translated by M.L. Dutková* Bedřich Bouček, 1964 *The Great Ordovician Biodiversification Event* Barry D. Webby, Florentin Paris, Mary L. Droser, Ian G. Percival, 2004-04-14 Two of the greatest evolutionary events in the history of life on Earth occurred during Early Paleozoic time The first was the Cambrian explosion of skeletonized marine animals about 540 million years ago The second was the Great Ordovician Biodiversification Event which is the focus of this book During the 46 million year Ordovician Period 489-443 m.y. a bewildering array of adaptive radiations of Paleozoic and Modern type biotas appeared in marine habitats the first animals arthropods walked on land and the first non vascular bryophyte like plants based on their cryptospore record colonized terrestrial areas with damp environments This book represents a compilation by a large team of Ordovician specialists from around the world who have enthusiastically cooperated to produce this first globally orientated internationally sponsored IGCP International Geological Correlation Program project on Ordovician biotas The major part is an assembly of genus and species level diversity data for the many Ordovician fossil groups The book also presents an evaluation of how each group diversified through Ordovician time with assessments of patterns of change and rates of origination and extinction As such it will become the standard work and data source for biotic studies on the Ordovician Period [The tentaculites of Bohemia \[Tentakuliti českých provrhů, angl.\] Their morphology, taxonomy, ecology, phylogeny and biostratigraphy](#) Bedřich Bouček, M. L. Dutková, 1964 *Past Environments of Mexico* Rosalía Guerrero-Arenas, Eduardo Jiménez-Hidalgo, 2024-04-01 Mexico is a biodiverse country The dynamics of environments from Mexico played a crucial role in the history of North American biota This book analyzes the paleoenvironmental conditions using several biological groups and various methods This book also demonstrates how this information is specifically used to elucidate Mexico's past environments and habitats terrestrial freshwater and marine This book fills an existing editorial gap since much of the information is dispersed in several bibliographic sources The authors are active paleontologists in diverse Mexican universities and research centers Their research activities contribute to the knowledge of the Mexican biota through geologic time [Journal of the Czech Geological Society](#), 2004 **Devonian Climate, Sea Level and Evolutionary Events** R. T. Becker, 1st, C. E. Brett, P. Königshof, 2nd, 2016-10-20 The geological and palaeontological records of climate change and evolutionary events reflect Earth's widely fluctuating climate systems Past climates hold the clues to understanding future developments In this context research on linked climate biodiversity and sea level fluctuations of the Devonian contributes to the general knowledge of deep time climate dynamics A fruitful co-operation between the International Geoscience Programme IGCP 596 and the International Subcommittee on Devonian Stratigraphy

SDS addressed the complex succession of climate linked Devonian global events of varying magnitude The primary goal of IGCP 596 was to assess mid Palaeozoic climate changes and their impact on marine and terrestrial biodiversity using an interdisciplinary approach The focus of SDS includes a revision of the eustatic sea level curve and the integration of refined chrono and biostratigraphy with modern chemo magneto cyclo event and sequence stratigraphy This enabled the much improved dating and correlation of abiotic perturbations evolutionary changes organism and ecosystem ranges Results by 37 authors are presented in 14 chapters which cover the entire Devonian

**Applied Palaeontology** Robert Wynn Jones, 2006-05-04 This book was first published in 2006 Palaeontology has developed from a descriptive science to an analytical science used to interpret relationships between earth and life history Applied Palaeontology adopts a holistic integrated approach to palaeontology highlighting its key role in the study of the evolving earth life history and environmental processes After an introduction to fossils and their classification each of the principal fossil groups are studied in detail covering their biology morphology classification palaeobiology and biostratigraphy The latter sections focus on the applications of fossils in the interpretation of earth and life processes and environments It concludes with case histories of how our knowledge of fossils is applied in industry and elsewhere This is a valuable reference for anyone involved in the applications of palaeontology including earth life and environmental scientists and petroleum minerals mining and engineering professionals

Introduction to Microfossil Biostratigraphy M. Dan Georgescu, 2021-09-24 This textbook will appeal to students and graduates making their first steps in the application of both microfossils and stratigraphy It presents in detail the historical development of microfossil biostratigraphy from its birth to the emergence of sequence stratigraphy including its roots in classical biostratigraphy The interplay between the academic and economical challenges on one hand and developments in microfossil biostratigraphy on the other is explored thoroughly The book also presents an introduction to the scientific concepts used in microfossil biostratigraphy practice and the uses in microfossil biostratigraphy of 25 groups of microfossils such as algae protists reproductive plant debris invertebrates chordates and vertebrates and microproblematica groups It also provides a numerical method to calculate the biostratigraphical resolution of these microfossil groups
