Skin Of Culture Investigating The New Electronic Reality:

<u>The Skin of Culture</u> Derrick De Kerckhove,1995 <u>The Digital Nexus</u> Raphael Foshay,2016-02-01 Over half a century ago in The Gutenberg Galaxy 1962 Marshall McLuhan noted that the overlap of traditional print and new electronic media like radio and television produced widespread upheaval in personal and public life Even without collision such co existence of technologies and awareness brings trauma and tension to every living person Our most ordinary and conventional attitudes seem suddenly twisted into gargoyles and grotesques Familiar institutions and associations seem at times menacing and malignant These multiple transformations which are the normal consequence of introducing new media into any society whatever need special study The trauma and tension in the daily lives of citizens as described here by McLuhan was only intensified by the arrival of digital media and the Web in the following decades The rapidly evolving digital realm held a powerful promise for creative and constructive good a promise so alluring that much of the inquiry into this new environment focused on its potential rather than its profound impact on every sphere of civic commercial and private life The totalizing scope of the combined effects of computerization and the worldwide network are the subject of the essays in The Digital Nexus a volume that responds to McLuhan s request for a special study of the tsunami like transformation of the communication landscape These critical excursions provide analysis of and insight into the way new media technologies change the workings of social engagement for personal expression social interaction and political engagement The contributors investigate the terms and conditions under which our digital society is unfolding and provide compelling arguments for the need to develop an accurate grasp of the architecture of the Web and the challenges that ubiquitous connectivity undoubtedly delivers to both public and private life Contributions by Ian Angus Maria Bakardjieva Daryl Campbell Sharone Daniel Andrew Feenberg Raphael Foshay Carolyn Guertin David J Gunkel Bob Hanke Leslie Lindballe Mark McCutcheon Roman Onufrijchuk Josipa G Petruni Peter J Smith Lorna Stefanick Karen Wall *Politics, Society, and the Media* Paul Wingfield Nesbitt-Larking,2007-01-01 Nesbitt Larking challenges his readers to become critical consumers of media and provides a number of strategies to encourage them to do so Nick Baxter Moore Brock University <u>User Error</u> Ellen Rose,2003 User Error doesn t argue that we should simply reject computers but neither does it uncritically embrace the current state of affairs but offers other options **Ordinary Consumption** Jukka Groncow,Alan Warde,2013-01-11 The sociology of consumption has concentrated unduly on the more spectacular and visual aspects of contemporary consumer behaviour thereby constructing an unbalanced and misleading view This collection emphasises ordinary rather than extraordinary items routine and repetitive behaviour rather than conscious decision making It studies practical contexts of use rather than decisions to purchase and analyses collective identification rather than personal identity Each essay argues one or more of these points for the most part using new empirical material from several different national contexts The topics analysed include shopping in Taiwan second home ownership in France environmental considerations concerning food choice

in Denmark the take up of new domestic technologies in Finland and kitchen design in England Key concepts like tradition routine and habit are clarified and new conceptual distinctions are made with the book defending theoretical approaches deriving from Simmel Weber Durkheim and Bourdieu Ordinary Consumption promotes a distinctive approach to the understanding of the central practices of consumer society it is a book with a controversial message one which will be a source of debate about the appropriate agenda for future research **Identity and Alterity** PEACE--Phenomenology for East-Asian CirclE. Lacan uses to analyze human reality the imaginary the symbolic and the real Nusselder analyzes our most intimate involvement with information technology the almost invisible affective aspects of technology that have the greatest impact on our lives Interface Fantasy lays the foundation for a new way of thinking that acknowledges the pivotal role of the screen in the current world of information And it gives an intelligible overview of basic Lacanian principles including fantasy language the virtual the real embodiment and enjoyment that shows their enormous relevance for understanding the current state of media technology   Dismantlings Matt Tierney,2019-12-15 For the master s tools the poet Audre Lorde wrote will never dismantle the master s house Dismantlings is a study of literary political and philosophical critiques of the utopian claims about technology in the Long Seventies the decade and a half before 1980 Following Alice Hilton s 1963 admonition that the coming years would bring humanity to a crossroads machines for HUMAN BEINGS or human beings for THE MACHINE Matt Tierney explores wide ranging ideas from science fiction avant garde literatures feminist and anti racist activism and indigenous eco philosophy that may yet challenge machines of war control and oppression Dismantlings opposes the language of technological idealism with radical thought of the Long Seventies from Lorde and Hilton to Samuel R Delany and Ursula K Le Guin to Huey P Newton John Mohawk and many others This counter lexicon retrieves seven terms for the contemporary critique of technology Luddism a verbal and material combat against exploitative machines communion a kind of togetherness that stands apart from communication networks cyberculture a historical conjunction of automation with racist and militarist machines distortion a transformative mode of reading and writing revolutionary suicide a willful submission to the risk of political engagement liberation technology a synthesis of appropriate technology and liberation theology and thanatopography a mapping of planetary technological ethics after Auschwitz and Hiroshima Dismantlings restores revolutionary language of the radical Long Seventies for reuse in the digital present against emergent technologies of exploitation subjugation and death   **Listening Publics** Kate Lacey,2013-05-03 In focusing on the practices politics and ethics of listening this wide ranging book offers an important new perspective on questions of media audiences publics and citizenship Listening is central to modern communication politics and experience but is commonly overlooked and underestimated in a culture fascinated by the spectacle and the politics of voice Listening Publics restores listening to media history and to theories of the public sphere In so doing it opens up profound questions for our understanding of mediated experience public participation and civic engagement Taking a cross national and interdisciplinary approach the book explores how listening publics have been constituted in relation to successive media technologies from the invention of writing to the digital age It asks how new practices of listening associated with sound and audiovisual media transform a public world forged in the age of print Through detailed histories and sophisticated theoretical analysis Listening Publics demonstrates the embodied and critical activity of listening to be a rich concept with which to rethink the practices politics and ethics of media communication   *Mobile and Sensor-Based Technologies in Higher Education* Sözüdoğru,

Oytun,Akkaya, Bülent,2022-09-23 At all educational levels innovation is progressively becoming an intrinsic aspect of learning The proliferation of mobile devices and sensor based technologies increased the possibilities for learning and pushed it into institutions One major challenge accompanying the growth in online education is that many teacher educators find themselves under pressure and underprepared to teach online courses As online education continues to grow curriculum and training that prepares teachers for online course design and delivery are critical Mobile and Sensor Based Technologies in Higher Education explores how mobile and sensor based technologies are shaping higher education and creating a roadmap for harnessing artificial intelligence online learning distance learning and other modern technologies to aid education Covering key topics such as assessment inclusive education and social distancing this reference work is ideal for policymakers researchers scholars academicians practitioners instructors and students   Spoken and Written Discourse in Online Interactions Maria Grazia Sindoni,2014-04-24 Winner of the AIA Book Prize for a research monograph in the field of English Language and Linguistics 2016 Common patterns of interactions are altered in the digital world and new patterns of communication have emerged challenging previous notions of what communication actually is in the contemporary age Online configurations of interaction such as video chats blogging and social networking practices demand profound rethinking of the categories of linguistic analysis given the blurring of traditional distinctions between oral and written discourse in digital texts This volume reconsiders underlying linguistic and semiotic frameworks of analysis of spoken and written discourse in the light of the new paradigms of online communication in keeping with a multimodal corpus linguistics theoretical framework Typical modes of online interaction encompass speech writing gesture movement gaze and social distance This is nothing new but here Sindoni asserts that all these modes are integrated in unprecedented ways enacting new interactional patterns and new systems of interpretation among web users These non verbal modes have been sidelined by mainstream linguistics whereas accounting for the complexity of new genres and making sense of their educational impact is high on this volume s agenda Sindoni analyzes other new phenomena ranging from the intimate sphere i e video chats personal blogs or journals on social networking websites to the public arena i e global scale transmission of information and knowledge in public blogs or media sharing communities shedding light on the rapidly changing global web scenario

Image Evolution Lars C. Grabbe,Patrick Rupert-Kruse,Norbert M. Schmitz,2019-01-23 The history of images can be described as a history of technology and mediality The development of images is deeply rooted in the potentials of media technologies and the numerous human inventions in the range of traditional craftsmanship engineering science computer science and art and design The factual embedding of images in the historical technological processes constitutes a complex structure of an autonomous image evolution that must be highlighted characterized and analyzed by the interdisciplinary academic discourses that are related to the functions and structures of visuality pictoriality and forms of multi sensoric representations The chosen term evolution is deliberately indicating structural laws that underlie historical events These

laws are intentional and logical processes of a historical and technological interdependency In this interdependency technology is evolving out of its inherent structures and additionally embedded in anthropological conditions and sociocultural dynamics In this context we should work with the concept of an image evolution   Slippery Pastimes Joan Nicks,Jeannette Sloniowski,2009-10-21 Sixteen essays written by specialists from many fields grapple with the problem of a popular culture that is not very popular but is seen by most as vital to the body politic whether endangered by globalization or capable of politically progressive messages for its audiences Slippery Pastimes covers a variety of topics Canadian popular music from rock n roll to country hip hop to pop Celtic television advertising tourism sport and even postage stamps As co editors Nicks and Sloniowski have taken an open view of the Canadian Popular and contributors have approached their topics from a variety of perspectives including cultural studies women s studies film studies sociology and communication studies The essays are accessibly written for undergraduate students and interested general readers   **Understanding Problems of Social Pathology** ,2006-01-01 A social reality including social pathology is constantly being constructed anew in the process of confrontation of perspectives and definitions of individuals institutions and social groups Therefore what interests the authors of the book more than the disputes on the right definition is the understanding of social pathology phenomena their causes mechanisms and social costs Complex and multidimensional as it is social reality is best described from various perspectives For that reason a potentially interesting and fruitful interdisciplinary approach characterises the book It contains mainly texts of psychologists who work at the Jagiellonian University in Cracow The articles of sociologists lawyers and one theoretician of education broaden the horizon and thus contribute new insights to the entirety of the book The body of articles predominantly relates to Polish reality as well as stems from the experience of the Polish society in the period of political transformation No less interesting are the articles on the pathology of political discourse community policing problems in France and issues of social concern victims of violence problems of the elderly and collective behaviour The volume is of interest for social scientists and professionals as well as for students
