Balick, 1991 Nature subsidy The regional setting The natural history of babassu Babassu in the household economy Babassu in the market economy Projects for development Nature subsidy revisited The Return of the Unicorns Eric Dinerstein, 2003-07-02 Beginning in 1984 Eric Dinerstein led a team directly responsible for the recovery of the greater one horned rhinoceros in the Royal Chitwan National Park in Nepal where the population had once declined to as few as 100 rhinos The Return of the Unicorns is an account of what it takes to save endangered large mammals In its pages Dinerstein outlines the multifaceted recovery program structured around targeted fieldwork and scientific research effective protective measures habitat planning and management public awareness campaigns economic incentives to promote local guardianship and bold uncompromising leadership that brought these extraordinary animals back from the brink of extinction In an age when scientists must also become politicians educators fund raisers and activists to safeguard the subjects that they study Dinerstein's inspiring story offers a successful model for large mammal conservation that can be applied throughout Asia and across the globe Hunting for Sustainability in Tropical Forests John Robinson, Elizabeth L. Bennett, 2000-02-08 Throughout the world people are concerned about the demise of tropical forests and their wildlife Hunting by forest dwelling people has a dramatic effect on wildlife in many tropical forests frequently driving species to local extinction with devastating implications for other species and the health of the forests themselves But wildlife is an important source of protein and cash for rural peoples Can hunting be managed to conserve biological communities while meeting human needs Are hunting rates as practiced by tropical forest peoples sustainable If not what are the biological social and cultural implications of this failure Answering these questions is ever more important as national and international agencies seek to integrate the development of local peoples with the conservation of tropical forest systems and species This book presents a wide array of studies that examine the sustainability of hunting as practiced by rural peoples Comprising work by both biological and social scientists Hunting for Sustainability in Tropical Forests provides a balanced viewpoint on the ecological and human aspects of this hunting The first section examines the effects of hunting on wildlife in tropical forests throughout the world The next section looks at the importance of hunting to local communities The third section looks at institutional challenges of resource management while the fourth draws on economic perspectives to understand both hunting and sustainability A final section provides synthesis and summary of the factors that influence sustainability and the implications for management Drawing on examples from Ecuador to Congo Zaire to Sulawesi Hunting for Sustainability in Tropical Forests will be a valuable resource to policymakers conservation organizations and students and scholars of biology ecology and anthropology

Amazonian Geographies Jacqueline Vadjunec, Marianne Schmink, 2014-07-16 Amazonia exists in our imagination as well as on the ground It is a mysterious and powerful construct in our psyches yet shares multiple trans national borders and diverse ecological and cultural landscapes It is often presented as a seemingly homogeneous place a lush tropical jungle teeming with exotic wildlife and plant diversity as well as the various indigenous populations that inhabit the region Yet since Conquest Amazonia has been linked to the global market and after a long and varied history of colonization and development projects Amazonia is peopled by many distinct cultural groups who remain largely invisible to the outside world despite their increasing integration into global markets and global politics Millions of rubber tappers neo native groups peasants river dwellers and urban residents continue to shape and re shape the cultural landscape as they adapt their livelihood practices and political strategies in response to changing markets and shifting linkages with political and economic actors at local regional national and international levels This book explores the diversity of changing identities and cultural landscapes emerging in different corners of this rapidly changing region This book was published as a special issue of the Journal of Cultural Geography

What is Environmental History? J. Donald Hughes, 2016-01-11 What is environmental history It is a kind of history that seeks understanding of human beings as they have lived worked and thought in relationship to the rest of nature through the changes brought by time In this new edition of his seminal student textbook J Donald Hughes provides a masterful overview of the thinkers topics and perspectives that have come to constitute the exciting discipline that is environmental history He does so on a global scale drawing together disparate trends from a rich variety of countries into a unified whole illuminating trends and key themes in the process Those already familiar with the discipline will find themselves invited to think about the subject in a new way This new edition has been updated to reflect recent developments trends and new work in environmental history as well as a brand new note on its possible future Students and scholars new to environmental history will find the book both an indispensable guide and a rich source of inspiration for future work

Incomes from the Forest Eva Wollenberg, Andrew Ingles, 1998-01-01 Documentation and comparison methods to assess options for forest based livelihoods and their outcomes The contributions are based on the premise that livelihood and conservation goals can be best achieved by improving information flow about changes in the environment and the impacts of forest use The authors report on the strengths and weaknesses of methods that have been tried in the field

Welfare, Inequality, and Resource Depletion Mariano Torras, 2019-10-28 This book breaks new ground by accounting for the welfare implications of both severe inequality and environmental degradation and developing a sustainable development indicator that incorporates changes over time in each of these dimensions The model is applied to data from Brazil spanning the 1965

1998 period The book s findings cast significant doubt on the proposition that rapid economic growth in Brazil has resulted in comparable welfare gains The evidence presented more generally illustrates the often unsustainable nature of rapid GDP growth phases as well as the general unreliability of GDP growth as an indicator of well being improvement The specific policy implication is that Brazil should discontinue or at least severely curtail the regressive and resource intensive economic policies it has followed in recent decades in the interest of welfare improvement not only for the poorer groups in society but for future generations of Brazilians as well

Getting Biodiversity Projects to Work Thomas O. McShane, Michael P. Wells, 2004-07-28 This book explores both the theoretical and practical underpinnings of integrated conservation and development It synthesizes existing experience to better inform conservationists and decision makers of the role ICDPs play in conservation and management and analyzes their successes and shortcomings
