Loehr,Megan L. Malone,2013-09-23 *The Evening of Life* Joseph E. Davis,Paul Scherz,2020-09-30

Although philosophy religion and civic cultures used to help people prepare for aging and dying well this is no longer the case Today aging is frequently seen as a problem to be solved and death as a harsh reality to be masked In part our cultural confusion is rooted in an inadequate conception of the human person which is based on a notion of absolute individual autonomy that cannot but fail in the face of the dependency that comes with aging and decline at the end of life To help correct the ethical impoverishment at the root of our contemporary social confusion *The Evening of Life* provides an

interdisciplinary examination of the challenges of aging and dying well. It calls for a re-envisioning of cultural concepts, practices, and virtues that embraces decline, dependency, and finitude rather than stigmatizes them. Bringing together the work of sociologists, anthropologists, philosophers, theologians, and medical practitioners, this collection of essays develops an interrelated set of conceptual tools to discuss the current challenges posed to aging and dying well, such as flourishing, temporality, narrative, and friendship. Above all, it proposes a positive understanding of thriving in old age that is rooted in our shared vulnerability as human beings. It also suggests how some of these tools and concepts can be deployed to create a medical system that better responds to our contemporary needs. The *Evening of Life* will interest bioethicists, medical practitioners, clinicians, and others involved in the care of the aging and dying.

American Dementia Daniel R. George, Peter J. Whitehouse, 2021-09-14. Have the social safety nets, environmental protections, and policies to redress wealth and income inequality enacted after World War II contributed to declining rates of dementia today, and how do we improve brain health in the future? Winner of the American Book Fest Health Aging 50 by the American Book Fest, Living Now Book Award, Mature Living Aging by the Living Now Book Awards. For decades, researchers have chased a pharmaceutical cure for memory loss. But despite the fact that no disease-modifying biotech treatments have emerged, new research suggests that dementia rates have actually declined in the United States and Western Europe over the last decade. Why is this happening? And what does it mean for brain health in the future? In *American Dementia*, Daniel R. George, PhD, MSc, and Peter J. Whitehouse, MD, PhD, argue that the current decline of dementia may be strongly linked to mid-twentieth-century policies that reduced inequality, provided widespread access to education and healthcare, and brought about cleaner air, soil, and water. They also explain why Alzheimer's disease, an obscure clinical label until the 1970s, is the hallmark illness of our current hyper-capitalist era. They reveal how the soaring inequalities of the twenty-first century, which are sowing poverty, barriers to healthcare and education, loneliness, lack of sleep, stressful life events, environmental exposures, and climate change, are reversing the gains of the twentieth century and damaging our brains. They tackle the ageist tendencies in our culture, which disadvantage both vulnerable youth and elders, and make an evidence-based argument that policies like single-payer healthcare, a living wage, and universal access to free higher education and technical training programs will build collective resilience to dementia. They promote strategies that show how local communities can rise above the disconnection and loneliness that define our present moment and come together to care for our struggling neighbors. Ultimately, *American Dementia* asserts that actively remembering lessons from the twentieth century, which help us become a healthier, wiser, and more compassionate society, represents our most powerful intervention for preventing Alzheimer's and protecting human dignity. Exposing the inconvenient truths that confound market-based approaches to memory enhancement, as well as broader social organization, the book imagines how we can act as citizens to protect our

brains build the cognitive resilience of younger generations and rise to the moral challenge of caring for the cognitively frail
