The Development of Behavior Gordon M. Burghardt, Marc Bekoff, 1978 *Behavioral Development* Klaus Immelmann, George W. Barlow, Lewis Petrinovich, Mary Biggar Main, 1981-11-30 *The Development of Expressive Behavior* Gail Zivin, 2013-09-24 The Development of Expressive Behavior Biology Environment Interactions articulates the aspects of how biology and environment interact in the development of expressive behavior The book brings together categories in the understanding of expressive behavior and its development The text delves on issues on the degree and breadth of linkage between states and expressive behaviors the theoretical and empirical specification of the referent of an expressive behavior and the methodological choices in studying the phenomenon Developmental psychologists ethologists primatologists and sociologists will find value in this work

Evolution of Animal Behavior Matthew H. Nitecki, Jennifer A. Kitchell, 1986 This volume highlights current research in the field of animal behavior with an emphasis on evolutionary perspectives The contributors represent paleontological field and experimental approaches They focus on a series of studies that confront wide ranging issues including sexual selection mate choice differential parental investment apparent altruism cooperative behavior and the relevance of phylogenetic constraints and historical information The volume will be of special interest to evolutionary biologists behavioral ecologists and paleontologists

The Development of Social Engagement Peter J. Marshall, Nathan A. Fox, 2006 The Development of Social Engagement edited by Peter J Marshall and Nathan A Fox brings together some of the latest research on social engagement processes across a range of life stages and species The opening chapters provide overviews of cutting edge research on social engagement in areas such as temperament face processing joint attention language development and early social cognition in humans Subsequent chapters address questions related to biological determinants of social systems play and maternal behavior across a variety of species as well as evolutionary issues associated with social engagement Finally a number of chapters examine the application of rigorous biologically focused research paradigms to the study of atypical social engagement in children Atypical social engagement is framed in terms of disorders such as autism and Williams Syndrome as well as in the effects of adverse early rearing environments such as institutions This volume will be a valuable guide for those interested in a neurobiological approach to the study of social development It provides an introduction to current research directions in this rapidly expanding field for both student and professional researchers in developmental psychology comparative psychology and developmental psychopathology

Carnivore Behavior, Ecology, and Evolution John L. Gittleman, 2019-05-15 The mammalian order Carnivora is characterized by an incredible range of morphological ecological and behavioral variation Carnivores can be as small as the 100 gram least weasel or as large as the 800 kilogram polar bear Their reproductive rate can vary from one offspring every five years as with some black bears to three litters a year as with the dwarf mongoose Group sizes can be traced along a wide continuum from the solitary ermine to the monogamous golden jackal to the large extended packs of as many as 80 spotted

hyenas Until recently the general habits of most wild carnivore species were inadequately understood In the last decade however improved technologies including the use of radiotelemetry and night vision scopes have led to many important discoveries This book is at once a critical summary and an evaluation of current research on carnivores A worthy successor to R F Ewer's monumental volume *The Carnivores* Cornell University Press it is the work of 30 leading carnivore biologists who here assemble comparative data on the basic anatomical behavioral ecological physiological reproductive and evolutionary characteristics of this group After a general introduction to the Carnivora the volume is divided in three parts each of which begins with a brief introduction outlining its main themes Part I Behavior covers acoustic and olfactory communication behavioral development behavioral ecology of canids and hyaenids modes of solitary living and group living In Part II Ecology topics include feeding ecology of the giant panda and Asiatic black bear adaptations for aquatic living ecological constraints on predation in felids consequences of small size in mustelids rate of basal metabolism and food habits and reproductive output Part III Evolution deals with the morphological approaches to phylogeny and the fossil record An appendix presents a complete classification of the Carnivora including topics of continuing controversy Highlighting recent developments in the study of the Carnivora and areas for further research this broad synthesis will be of great value of students and researchers in animal behavior behavioral ecology wildlife ecology mammalogy paleontology systematics and evolution theory It will also encourage realistic conservation programs to manage rapidly diminishing populations and will elucidate particular features of the carnivores for nonspecialist readers

Evolutionary Biology Max Hecht, 2012-12-06

Evolutionary Biology of which this is the nineteenth volume continues to offer its readers a wide range of original articles reviews and commentaries on evolution in the broadest sense of that term The topics of the reviews range from anthropology and behavior to molecular biology and systematics In recent volumes a broad spectrum of articles have appeared on such subjects as natural selection among replicating molecules in vitro mate recognition and the reproductive behavior in *Drosophila* evolution of the monocotyledons species selection and the communication network made possible among even distantly related genera of bacteria by plasmids and other transposable elements Articles such as these often too long for standard journals are the stuff of *Evolutionary Biology* The editors continue to solicit manuscripts on an international scale in an effort to see that everyone of the many facets of biological evolution is covered Manuscripts should be sent to anyone of the following Max K Hecht Department of Biology Queens College of the City University of New York Flushing New York 11367 Bruce Wallace Department of Biology Virginia Polytechnic Institute and State University Blacksburg Virginia 24061 Ghillian T Prance New York Botanical Garden Bronx New York 10458
