Clayton, 2012-10-02 At times mirroring and at times shockingly disparate to the rise of traditional white American medicine the history of African American health care is a story of traditional healers root doctors granny midwives underappreciated and overworked African American physicians scrupulous and unscrupulous white doctors and scientists governmental support and neglect epidemics and poverty Virtually every part of this story revolves around race More than 50 years after the publication of An American Dilemma Gunnar Myrdal's 1944 classic about race relations in the USA An American Health Dilemma presents a comprehensive and groundbreaking history and social analysis of race race relations and the African American medical and public health experience Beginning with the origins of western medicine and science in Egypt Greece and Rome the authors explore the relationship between race medicine and health care from the precursors of American science and medicine through the days of the slave trade with the harrowing middle passage and equally deadly breaking in period through the Civil War and the gains of reconstruction and the reversals caused by Jim Crow laws It offers an extensive examination of the history of intellectual and scientific racism that evolved to give sanction to the mistreatment medical abuse and neglect of African Americans and other non white people Also included are biographical portraits of black medical pioneers like James McCune Smith the first African American to earn a degree from a European university and anecdotal vignettes like the tragic story of the Hottentot Venus which illustrate larger themes An American Health Dilemma promises to become an irreplaceable and essential look at African American and medical history and will provide an invaluable baseline for future exploration of race and racism in the American health system Henry E. Sigerist Henry Ernest Sigerist, Marcel H. Bickel, 2010 Henry E Sigerist 1891 1957 is known as the most influential medical historian in the first half of the 20th century More than that he was a scholar of an unusually broad spectrum of activities 50 years after his death he is still the subject of publications During his active life in Zurich Leipzig Baltimore and again in Switzerland he exchanged letters with some 300 correspondents of all walks of cultural life The letters to Sigerist as well as the copies of his own letters are preserved in near completeness a fact that allowed an unabridged and annotated edition This volume contains Sigerist's correspondences with the architect of American medicine William H Welch the pioneer brain surgeon Harvey Cushing the medical bibliographer Fielding H Garrison and the medical historian Erwin H Ackerknecht The letters allow insight into the correspondents biographies and activities their private lives and relationships between persons topics and books They also reflect the eventful time of the mid 20th century To each of the four correspondences is added an introduction and indices of literary works and of persons mentioned The Oxford History of the British Empire: Historiography Robin W.
