Stuttering Margaret Fawcus,1995-07 Stuttering Margaret Fawcus,1995 *New Directions in Stuttering* Dominick A. Barbara,1968 *The New Theory and Practice for the Cure of Stammering, Stuttering and All Other Defects of Speech, Etc* Joel Cadwalader Ball,1890 **Stuttering and Cluttering (Second Edition)** David Ward,2017-08-15 Stuttering and Cluttering provides a clear accessible and wide ranging overview of both the theoretical and clinical aspects of two disorders of fluency stuttering and cluttering This edition remains loyal to the idea that stuttering and cluttering can best be understood by first considering various overarching frameworks which can then be expanded upon and provides a clear position from which to disentangle the often complex interrelationships of these frameworks The book is divided into two parts the first of which mainly deals with theory and aetiology while the second focuses on clinical aspects of assessment diagnosis and treatment The book also provides frequent references across Parts I and II to help link the various areas of investigation together This revised edition of Stuttering and Cluttering reflects the major changes in thinking regarding both theory and therapy that have taken place since the publication of the first edition As well as those who stutter and clutter the book will be invaluable for speech language therapy speech language pathology students practicing clinicians psychologists and linguists around the world **Hypnotic Therapeutics in Theory and Practice** John Duncan Quackenbos,1908

Stuttering and Cluttering David Ward,2008-06-03 Stuttering and Cluttering provides a comprehensive overview of both theoretical and treatment aspects of disorders of fluency stuttering also known as stammering and the lesser known cluttering The book demonstrates how treatment strategies relate to the various theories as to why stuttering and cluttering arise and how they develop Uniquely it outlines the major approaches to treatment alongside alternative methods including drug treatment and recent auditory feedback procedures Part one looks at different perspectives on causation and development emphasizing that in many cases these apparently different approaches are inextricably intertwined Part two covers the assessment diagnosis treatment and evaluation of stuttering and cluttering In addition to chapters on established approaches there are sections on alternative therapies including drug therapy and auditory feedback together with a chapter on counselling Reference is made to a number of established treatment programs but the focus is on the more detailed description of specific landmark approaches These provide a framework from which the reader may not only understand others treatment procedures but also a perspective from which they can develop their own Offering a clear accessible and comprehensive account of both the theoretical underpinning of stammering therapy and its practical implications the book will be of interest to speech language therapy students as well as qualified therapists psychologists and to those who stutter and clutter **Stuttering** Barry Guitar,2013-01-29 Stuttering An Integrated Approach to Its Nature presents the most comprehensive textbook on the topic today providing an overview of the etiology and development of stuttering and details appropriate approaches to accurate assessment and treatment Exploring a variety of practice settings this core introductory

book grounds all topics in a firm basis of the disorder's origin and nature This edition has been thoroughly updated to address all current methodologies

The Treatment of Stuttering in the Young School Aged Child Roberta Lees, 2005-03-11 This practical text brings together well known writers from the UK USA and Australia It sets out to discuss the assessment and treatment of the young school aged child who stutters aged approx 7 to 12 years A number of differing treatment approaches for this client group are presented in the one volume The contributors as well as describing their treatment approaches have considered the theoretical models on which their approaches are based and ways of measuring outcomes an important topic in an age of evidence based practice In order to gain a more comprehensive view of the school aged child one chapter considers epidemiology of stuttering whilst two chapters address the issue of concomitant problems such as other language problems and ADHD This text is written for students and clinicians working with children who stutter It will also be of interest to researchers

The Dysfluency Resource Book Jackie Turnbull, Trudy Stewart, 2017-07-05 This is a comprehensive resource book for treating adults who stammer Completely revised and updated to take account of current practice this new edition draws together the latest information on therapy for adults along with practical examples of exercises tasks and activities that can be used for both individual and group programmes With new chapters and therapy ideas this is an extremely useful resource for all speech language therapists and students working with adults who stammer This useful resource seeks to explain techniques for treating people who stammer and the rationale for their use This volume forms a catalogue of treatment options from which clinicians may choose to use all of the techniques or pick out particular sections according to their clients special requirements The first edition of this book proved to be a very useful tool for speech and language professionals and this new edition has come about largely because clinicians speech and language therapists and teachers have requested it With the inclusion of 50 photocopiable handouts and the presentation of the chapters in the order they would use with their own group programmes the authors set out the principles of therapy in such a way that the treatment techniques fit into a clear management approach Trudy Stewart is a specialist in dysfluency and has been a service manager since 1986 She studied in America and obtained her PhD in 1991 Jackie Turnbull retired from SLT in July 2009 after 40 years in the profession over 35 of which were spent as a specialist in dysfluency working with children and adults She also worked for many years as a staff counsellor in a large hospital The collaboration that has grown up between the two of them has sparked further study in stammering Together they have developed a highly creative clinical practice which has national recognition
