Western Dominance in International Relations? Audrey Alejandro, 2018-10-10 Since the 1970s a critical movement has been developing in the humanities and social sciences denouncing the existence of Western dominance over the worldwide production and circulation of knowledge However thirty years after the emergence of this promising agenda in International Relations IR this discipline has not experienced a major shift This volume offers a counter intuitive and original contribution to the understanding of the global circulation of knowledge In contrast to the literature it argues that the internationalisation of social sciences in the designated Global South is not conditioned by the existence of a presumably Western dominance Indeed although discriminative practices such as Eurocentrism and gate keeping exist their existence does not lead to a unipolar structuration of IR internationalisation around the West Based on these empirical results this book reflexively questions the role of critique in the re production of the social and political order Paradoxically the anti Eurocentric critical discourses reproduce the very Eurocentrism they criticise This book offers methodological support to address this paradox by demonstrating how one can use discourse analysis and reflexivity to produce innovative results and decentre oneself from the vision of the world one has been socialised into This work offers an insightful contribution to International Relations Political Theory Sociology and Qualitative Methodology It will be useful to all students and scholars interested in critical theories international political sociology social sciences in Brazil and India knowledge and discourse Eurocentrism as well as the future of reflexivity

Community-Based Interventions John W. Murphy, 2014-01-02 For decades community centered social services have been promoted as an admirable ideal Yet the concept of decentralized services delivered where people live has proved to be an elusive ideal as well with the promise of empowerment often giving way to disinterest and apathy Community Based Interventions examines the reasons community programs tend to founder and proposes a realistic framework for sustained success The book s theoretical philosophical and political foundations begin with the importance of context as in local knowledge and community self definition and engagement Innovative often startling approaches to planning design and implementation begin with the recognition that communities are not targets or locations to be fixed but social realities whose issues require concrete answers The variety of examples described in these chapters demonstrate the power of community interventions in providing effective services reducing inequities and giving individuals greater control over their health their environment and in the long run their lives Included in the coverage Redefining community the social dimensions A new

epidemiology to inform community work The role of research in designing community interventions The conceptual flow of a community based project Building autonomy through leadership from below Relating social interventions to social justice Attuned to the current era of health and mental health reform Community Based Interventions represents a major step forward in its field and makes an inspiring text for social workers clinical social workers public health administrators and community activists
