The Dependencies Of Objects Linguistic Inquiry Monographs:

The Dependencies of Objects Esther Torrego, 1998 This monograph investigates the nature properties and consequences of the grammatical constraints that yield overt marking of objects in a variety of languages The author working within the Minimalist Program concentrates on the syntactic and semantic behaviors of a particular class of objects objects morphologically marked by the dative preposition in Romance languages especially in several Spanish dialects with consideration of similar phenomena in other languages The central questions addressed revolve around the syntactic derivations that have accusative and dative complements and the role played by doubling clitics in these derivations The analysis concerned primarily with Case theory unifies syntactic phenomena by isolating the grammatical factors that yield structures with accusative and dative objects The monograph also includes an extended discussion of some classical themes of syntactic theory in the Romance languages including asymmetries in the wh movement of objects with clitics and causatives Linguistic Inquiry Monograph 34

Subject Clitics in the Northern Italian Dialects Cecilia Goria, 2012-11-02 1 0

INTRODUCTION This book provides an encompassing analysis of Subject Clitics (SCLs) by giving a detailed description of these elements in two varieties of Piedmontese a Northern Italian Dialect Astigiano and Turinese spoken in the areas of Asti and Turin respectively It accounts for the structural position and function of these elements inside the computational system and for their morphological and distributional properties It also provides an empirical and theoretical comparison between Piedmontese SCLs and SCLs in other Northern Italian Dialects NIDs of SCLs types in the NIDs have been regarded as Since the 1980s the majority elements of agreement in that they contribute to the realisation of subject verb agreement by expressing features of the subject similar in a way to verbal inflection Nonetheless SCLs are not to be assimilated to verbal affixes as they exhibit different properties Most distinctively they can be separated from the verb by other clitic elements and in the case of the varieties considered here SCLs are optional in all contexts and may be omitted in coordination A more refined identification of SCLs separates SCLs which encode agreement features from those which do not and are related to pragmatic factors as originally observed by Beninca 1994 with respect to the clitic *a* in Paduan The different morphological and syntactic properties that characterise SCLs across the NIDs have justified numerous accounts which regard them as head of their own projection

International Encyclopedia of Linguistics William J.
