The Lunar Effect Biological Tides And Human Emotions:

The Lunar Effect Arnold L. Lieber, 1978 A practicing psychiatrist presents new scientific evidence which indicates that the moon may influence not only man's geophysical environment but his day to day behavior as well *The Lunar Effect* Arnold L. Lieber, 1980-09-01 **Time of the End** Dorrance Publishing Company, Incorporated, 2005 **Cosmic Influences on Humans, Animals, and Plants** John T. Burns, 1997 This annotated bibliography makes available to the general reader and scholar a broad survey of the scientific literature on alleged cosmic influences on humans animals and plants To be included a study must involve the collection of data or be a commentary on studies based on data As some of the topics covered are still quite controversial in nature while other topics have been scientifically studied to some extent the terms alleged claimed or suggested are noted in the citations to remind the reader that a particular study has not necessarily been proven to be scientifically valid The four parts of Cosmic Influences on Humans Animals and Plants are organized around alleged effects of solar activity the moon the planets and possible mechanisms for such actions Some effects that the sun and moon are known to have on our daily lives such as the cycles of light and dark and the lunar tides have not been included because of their commonality However other effects such as those influences the moon has been shown to have over some animals have been included for the sake of completeness With subject and author indexes [The Human Cosmos](#) Jo Marchant, 2021-09-07 A Best Book of 2020 NPR A Best Book of 2020 The Economist A Top Ten Best Science Book of 2020 Smithsonian A Best Science and Technology Book of 2020 Library Journal A Must Read Book to Escape the Chaos of 2020 Newsweek Starred review Booklist Starred review Publishers Weekly A historically unprecedented disconnect between humanity and the heavens has opened Jo Marchant's book can begin to heal it For at least 20 000 years we have led not just an earthly existence but a cosmic one Celestial cycles drove every aspect of our daily lives Our innate relationship with the stars shaped who we are our art religious beliefs social status scientific advances and even our biology But over the last few centuries we have separated ourselves from the universe that surrounds us It's a disconnect with a dire cost Our relationship to the stars and planets has moved from one of awe wonder and superstition to one where technology is king the cosmos is now explored through data on our screens not by the naked eye observing the natural world Indeed in most countries modern light pollution obscures much of the night sky from view Jo Marchant's spellbinding parade of the ways different cultures celebrated the majesty and mysteries of the night sky is a journey to the most awe inspiring view you can ever see looking up on a clear dark night That experience and the thoughts it has engendered have radically shaped human civilization across millennia The cosmos is the source of our greatest creativity in art in science in life To show us how Jo Marchant takes us to the Hall of the Bulls in the caves at Lascaux in France and to the summer solstice at a 5 000 year old tomb at Newgrange Ireland We discover Chumash cosmology and visit medieval monks grappling with the nature of time and Tahitian sailors navigating by the stars We discover how light reveals the chemical composition of the sun and we are with Einstein as he

works out that space and time are one and the same A four billion year old meteor inspires a search for extraterrestrial life

McCrae,2011-10-19 Lunacy the legendary notion of minds unhinged by the moon continues to captivate the popular imagination Although it violates the assumptions of modern science and psychiatry such belief remains common among mental health workers Furthermore several studies have found a small unexplained correlation between behaviour and the lunar cycle The book is divided into two parts It begins with a historical account of the lunacy concept followed by an investigation of hypothetical mechanisms for a lunar effect *The Key to the Qigong Meditation State* Tianjun

Liu,2016-12-21 Focusing on Rujing the meditation state fundamental to Qigong meditation this ground breaking book looks at the practice from the perspective of psychology and cognitive science It describes what happens in mind and body during meditation and how to reach the state of Rujing The Psychology and Science of Pseudoscience Terence Hines,2025-03-12 This book provides a comprehensive review of numerous areas of pseudoscience and related pathological science It not only describes the factual bases for rejecting pseudoscientific claims but also emphasizes the psychological processes that lead to the acceptance of such claims This book is timely given the increase in misinformation over the past decade Using three principles of cognitive psychology this book helps explain why people are hard wired to accept and continue to believe in pseudoscientific claims It provides up to date discussions of numerous paranormal and pseudoscientific topics including the usual suspects UFOs and alien abductions astrology cryptozoology and more but also belief in conspiracy theories laboratory parapsychology bogus forensic science techniques the pseudopsychologies of Freud medical fraud and the unethical practices of Big Pharma Older research that was foundational in the critical examination of several topics is woven throughout to situate them in a historical context Earth-Moon Relationships Cesare Barbieri,Francesca

Rampazzi,2013-06-29 Sediments and sedimentary processes on the Moon and Earth are very different In the absence of water an atmosphere the magnetosphere and much less oxygen in its rocks the Moon has neither clay minerals nor carbonates and no Fe₃ Mechanical weathering by impacts is the principal process of sediment generation on the Moon on Earth chemical weathering predominates Whereas processes of sediment transport are principally ballistic on the Moon movement by air water and ice prevail on the Earth The radical differences between Earth and Moon sediments make them useful end members between which all sediments of all terrestrial planetary bodies are expected to lie The purpose of this paper is 1 to compare and contrast major characteristics of the origin transportation deposition and preservation of sediments especially dust in the Earth and the Moon and 2 to suggest how sediments of other rocky planetary bodies especially Mars may fit in between the sediments of the Earth and the Moon The Secret Influence of the Moon Louis Proud,2013-12-01 The Moon is not a cold dead rock but a rich fascinating world just as alive as Earth Investigates the Moon as the home of an alien intelligence who controls humanity Examines several of NASA s Apollo missions and the findings they concealed

Reveals the many holes in the Giant Impact theory about the Moon's origins and the evidence for a hollow artificial Moon
Explores the deep influence of the Moon on the collective mind of humanity and occult teachings about the Moon from the Qabalah tarot and other sources Despite being the most prominent celestial body after the Sun the Moon has many qualities that science has yet to explain Lunar rock samples reveal the Moon once had a magnetic field like the Earth and seismic experiments by NASA suggest the Moon is at least partially hollow For centuries people have observed lights moving clouds and shadows and even the disappearance of entire craters via telescope Apollo astronauts repeatedly felt the presence of a non human intelligence during their Moon visits and many indigenous traditions speak of malevolent visitors from the Moon A growing body of astrophysical and geological evidence shows the Moon is not an entirely natural world that someone or something altered it long ago Louis Proud explores the phases and movements of the Moon along with its ancient and mysterious features its craters maria rilles tunnels and domes He examines several of NASA's Apollo missions showing not that NASA faked the Moon expeditions but that they concealed what the astronauts found there He explains the many holes in the commonly accepted Giant Impact theory of the Moon's origins and reveals the evidence for a hollow artificial Moon placed in orbit eons ago to observe Earth Examining the deep influence of the Moon on the collective mind of humanity Proud looks at what the Qabalah the tarot and other occult traditions say about the Moon and interprets G I Gurdjieff's teachings that we are food for the Moon He investigates the Moon as a gateway to another realm as the Purgatory of Christianity and as the home of an alien intelligence who controls and exploits humanity Examining the Moon from both scientific and esoteric perspectives Proud shows the Moon is not a cold dead rock but a rich fascinating world just as alive as Earth

Light of the Himalayas Kavitaran Shrestha, 2017-06-29 To those who associate Siddhartha's enlightenment with magical happenings Light of the Himalayas is an answer The novel traces the gradual development of Siddhartha from an inquisitive child to a serious explorer on a trajectory of science and objectivity until his discovery of the elixir of life the eight fold path and the four golden rules The book decenters many myths and misconceptions about the life of the Buddha and invites readers to engage in scientific discourse about the religion

Menstruation Across Cultures Nithin Sridhar, 2021-08-26 Menstruation across Cultures attempts to provide a detailed review of menstruation notions prevalent in India and in cultures from across the world The world cultures covered in the book include Indic traditions like Hinduism Buddhism Jainism and Sikhism ancient civilisations like Greece Rome Mesopotamia and Egypt and Abrahamic religions of Judaism Christianity and Islam Two themes of special focus in the book are Impurity and Sacrality While they are often understood as being opposed to each other the book examines how they are treated as two sides of the same coin when it comes to menstruation This is especially true in Indic traditions and pre Christian polytheistic traditions like Greco Roman Mesopotamian and Egyptian Impurity and Sacrality complement each other to form a comprehensive worldview in these cultures The book also examines how the understanding of impurity in Abrahamic religions differs from those of polytheistic

cultures As part of the examination of the sacrality attached to menstruation a special focus has also been given to the deities of menstruation in polytheistic cultures and to what Ayurveda and Yoga say about this essential function in a woman's physiology Finally a comparative study of menstrual notions prevalent in modernity is presented along with a Do and Don't dossier

Acorns: Windows High-Tide Foghat Joshua Morris,2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self Having chosen to focus upon ego established securely by the time of Christ much more beta brain wave development will destroy our species and others which process has already begun We create our own realities through beliefs intents and desires and we were in and out of probabilities constantly Feelings follow beliefs not the other way around

Consciousness and Evolution James Christodoulides,2012-08-01 Understanding the nature of consciousness is the key to understanding the whole of reality It is not that mind has emerged from matter but rather that consciousness and matter are dual aspects of a much greater reality Beyond the simplistic notion of duality that is so entrenched in Western philosophies there is a deeper and more profound way to comprehend the nature of our existence We are parts within a wider whole We do not exist as separate beings within the Universe we are parts of the Universe itself The theory outlined in Consciousness and Evolution turns orthodox explanations for the evolution of mind upside down It is not matter that has created consciousness but rather it is consciousness that has moulded matter and created intelligent beings like ourselves In order to understand why we are here and to live our lives as fully as we might we must seek to address the issue at the very core of our being the existence of mind itself
