*Snow Leopards in Nepal* Pavel Kindlmann, 2022-09-30 Snow leopard *Panthera uncia* is an endangered species and its population size is steadily declining The main threats to the snow leopard include illegal trade conflict with locals human snow leopard conflict lack of conservation awareness and policy and climate change To avoid its extinction we badly need a good knowledge of its ecology distribution and population dynamics including interactions with its prey which will take into account various scenarios of changes in climate and human impact on snow leopard This book aims to put together a considerable amount of unpublished

data collected by the co author of most of the chapters Bikram Shrestha which might be useful for other researchers working on snow leopard In addition researchers might find it useful to have a key for determining the diet of snow leopard based on remnants of its food in its scats Last but not least based on the difficulty we experienced trying to compare and combine different sets of results we propose a general methodology for collecting data Thus this book is not an all encompassing compendium but an attempt to fill some gaps in the literature and to show how to publish new data on snow leopard in a useful and workable way The first part describing the main features of snow leopard and its main prey ecology is followed by a comprehensive review of data available on its abundance and threats to its survival The third most extensive part the substance of the book presents new data from 15 years of intensive camera trapping combined with scat sampling These data are analyzed by means of advances GIS and genetic techniques which yields a large amount of conservation implications The purpose of this book is to provide a tool for both environmental managers and researchers to find quickly what is known about this species for conservation planning and for an effective protection of snow leopard However enthusiasts interested in wild cats may welcome the book too

**Snow Leopard (Panthera Uncia).** , As part of Kids Planet Defenders of Wildlife presents a fact sheet on the Snow Leopard Panthera uncia which is an endangered species The snow leopard is a solitary animal that lives in the high mountains of central Asia The fact sheet provides a description of the leopard and highlights information on such topics as the lifespan size range diet behavior and offspring of the leopard
