## **Social And Applied Aspects Of Perceiving Faces:**

*Social and Applied Aspects of Perceiving Faces* Thomas R. Alley, 2013-05-13 This interdisciplinary overview integrates a variety of perspectives on the process and interpretation of faces as a major source of verbal and nonverbal communication. Written by authors from social experimental and cognitive psychology as well as from the dental sciences *Social and Applied Aspects of Perceiving Faces* covers topics including normal variation in facial appearance and facial anomalies **Life Like Dolls** A. F. Robertson, 2004-03-01 Since the 1980s there has been a growing billion dollar business producing porcelain collectible dolls. Advertised in Sunday newspapers and mailbox fliers even Marie Osmond an avid collector herself is now promoting her own line of dolls on the Home Shopping Network and sales are soaring. With average price tags of 100 and 500 or more for a handcrafted or limited edition doll these dolls strike a chord in the hearts of middle aged and older women their core buyers some of whom create nurseries devoted to collections that number in the hundreds. Each doll has its own name identity and adoption certificate like Shawna who has just learned to stack blocks all by herself and Bobby whose brown handset eyes shine with mischief and little boy plans. Exploring the nexus of emotions consumption and commodification they represent A F Robertson tracks the rise of the porcelain collectible market interviews the women themselves and visits their clubs fairs and homes to understand what makes the dolls so irresistible. Lifelike but freakish novelties that profess to be antiques pricey kitsch. These dolls are the product of powerful emotions and big business. *Life Like Dolls* pursues why middle class educated women obsessively collect these dolls and what this phenomenon says about our culture. *Is an Objective Measuring System for Facial Attractiveness Possible?* Mounir Bashour, 2007-06 here exists a need for the creation of an objective system for measuring facial attractiveness and along with it a detailed mathematical analysis and understanding of facial sexual dimorphism. Both the areas of ophthalmic and facial plastic and reconstructive surgery and the areas of facial attractiveness and recognition research in psychology would greatly benefit from achieving these goals. The objective of this work has been to develop and test a system for measuring facial attractiveness in an objective manner and analyze orbital and facial sexual dimorphism. A facial overlay system or mask variously called the phi archetypal golden or golden ratio mask has been claimed to be capable of being adapted to create an objective system for measuring facial attractiveness. The central hypothesis of the thesis is that the phi mask can be used to create an objective measurement system for facial attractiveness. Over a period of seven years we have created a standardized high resolution photographic facial database of 18 30 year old male and female adults as well as database of linked facial anthropometric and photogrammetric measurement data. We have also designed a system using the phi mask that attempts to measure facial attractiveness objectively and tested it against our facial database. Finally we have made a detailed analysis of the measurement data and previous literature with respect to precisely defining sexual dimorphism around the eyes and face. Results support our central hypothesis in that the phi mask in its current form does yield a measure for objective

attractiveness that correlates to the current gold standard measure of attractiveness truth of consensus However while the mask is capable of explaining a major portion of the variance in facial attractiveness it is not the final complete answer Strengths weaknesses and limitations of the approach and the model used are discussed and ideas and directions for further research to develop a more accurate system are suggested The analysis of the orbits and the face for sexual dimorphism yielded a great deal of new data and have lead to an understanding of sexual differences that have practical implications for both surgery and further facial research Applications of the research include Preoperative aids for planning plastic and reconstructive surgery cosmetic surgery and sex altering surgery standards for analyzing the eyes for academic study standards for quantifying the features of the eyes for use in an identification system aid in application of cosmetics aid in understanding the psychological impact of eyes on the judgment of attractiveness creation of a standardized database of digital high resolution facial photographs and linked anthropometric and demographic database to be made available to the world community of facial researchers use of the databases by researchers for face recognition research facial attractiveness research etc

**Physical Appearance and Gender** Linda A. Jackson,1992-01-01 This book examines two kinds of research research in social psychology and in clinical psychology into the effects of physical appearance on person perception Both are explored with the objective of identifying gender similarities and differences on the effects of physical appearance The theoretical framework for integrating the two approaches is presented with implications of this framework for future research social change and psychotherapy The book demonstrates that gender must be considered in research on physical appearance effects

The Vampire in Contemporary Popular Literature Lorna Piatti-Farnell,2013-11-07 Prominent examples from contemporary vampire literature expose a desire to re evaluate and re work the long standing folkloristic interpretation of the vampire as the immortal undead This book explores the new vampire as a literary trope offering a comprehensive critical analysis of vampires in contemporary popular literature and demonstrating how they engage with essential cultural preoccupations anxieties and desires Drawing from cultural materialism anthropology psychoanalysis literary criticism gender studies and postmodern thought Piatti Farnell re frames the concept of the vampire in relation to a distinctly twenty first century brand of Gothic imagination highlighting important aesthetic conceptual and cultural changes that have affected the literary genre in the post 2000 era She places the contemporary literary vampire within the wider popular culture scope also building critical connections with issues of fandom and readership In reworking the formulaic elements of the vampiric tradition and experimenting with genre bending techniques this book shows how authors such as J R Ward Stephanie Meyers Charlaine Harris and Anne Rice have allowed vampires to be moulded into enigmatic figures who sustain a vivid conceptual debt to contemporary consumer and popular culture This book highlights the changes conceptual political and aesthetic that vampires have undergone in the past decade simultaneously addressing how these changes in vampire identity impact on the definition of the Gothic as a whole
