Social Constructionism, Discourse and Realism Ian Parker, 1998-04-28 This book charts a clear and accessible path through some of the key debates in contemporary psychology Drawing upon the wider critical and discursive turn in the human sciences Social Constructionism Discourse and Realism explores comprehensively the many claims about what we can know of reality in social constructionist and discursive research in psychology Relativist versus realist tensions go to the heart of current theoretical and methodological issues not only within psychology but across the social and human sciences By mapping the connections between theory method and politics in social research and placing these within the context of the broader social constructionist and discursive debates the internationally renowned contributors offer the reader an invaluable survey of the debates Social Construction, Discourse and Realism Ian Parker, 1998 In this broad ranging

overview of the contemporary debates surrounding social constructionist perspectives in psychology the contributors map important connections between theory method and politics in social research Social Constructionism Vivien Burr, 2024-11-15 The fourth edition of this seminal work introduces students to social constructionism Using a variety of examples from everyday experience and from existing research in areas such as personality sexuality and health it clearly explains the basic theoretical assumptions of social constructionism Drawing on a range of empirical studies the book clearly defines the various approaches to social constructionist theory and research and explores the theoretical and practical issues they raise It presents and analyses key debates such as the nature and status of knowledge truth reality and the self in an accessible style The new edition has been updated with relevant and contemporary references to aid understanding of key theoretical and methodological issues The author additionally utilises new illustrative examples from research and contemporary life such as the MeToo movement BlackLivesMatter and Post Truth politics The updated work has also been expanded to include an extended discussion of affect and embodiment and a number of exercises to help illustrate important concepts Social Constructionism extends and updates the material covered in previous editions and will be an invaluable and informative resource for undergraduate and postgraduate students of Psychology Sociology Education and other related disciplines

Unfolding Social Constructionism Fiona J. Hibberd, 2006-11-24 For more than half of the 20 century psychologists sought to locate the causes of behaviour in individuals and tended to neglect the possibility of locating the psychological in the social In the late 1960s a reaction to that neglect brought about a crisis in social psychology This crisis did not affect all social psychologists some remained seemingly oblivious to its presence others dismissed its significance and continued much as before But in certain quarters the psychological was re conceptualised as the social and the social was taken to be sui generis Moreover the possibility of developing general laws and theories to describe and explain social interaction was rejected on the grounds that as social beings our actions vary from occasion to occasion and are for many reasons unrepeatable There is so it was thought an inherent instability in the phenomena of interest The nomothetic ideal

was said to rest on individualistic cause effect positivism of the kind which arguably characterised the natural sciences but social psychology so it was said is an historical inquiry and its conclusions are necessarily historically relative Gergen 1973 Events outside psychology converged to give impetus to the crisis within **What Is a Person?** Christian Smith,2010-09-15 What is a person This fundamental question is a perennial concern of philosophers and theologians But Christian Smith here argues it also lies at the center of the social scientist s quest to interpret and explain social life In this ambitious book Smith presents a new model for social theory that does justice to the best of our humanistic visions of people life and society Finding much current thinking on personhood to be confusing or misleading Smith finds inspiration in critical realism and personalism Drawing on these ideas he constructs a theory of personhood that forges a middle path between the extremes of positivist science and relativism Smith then builds on the work of Pierre Bourdieu Anthony Giddens and William Sewell to demonstrate the importance of personhood to our understanding of social structures From there he broadens his scope to consider how we can know what is good in personal and social life and what sociology can tell us about human rights and dignity Innovative critical and constructive What Is a Person offers an inspiring vision of a social science committed to pursuing causal explanations interpretive understanding and general knowledge in the service of truth and the moral good
