Situating Sound And Rhythm:

Sound Worlds from the Body to the City Ariane Wilson, 2019-03-13 This volume reveals the extent to which aural perception influences our spatial awareness Spanning various fields and practices from psychology to geography and from zoology to urban planning it covers a range of environments in which sounds contribute to forming our sense of space and place The contributions gathered here lead from the mother's womb through the habitats of insects and owls to the resonating bodies of buildings and the city to artistic endeavours that aim to consciously reveal the spatiality of sound In this progression the book demonstrates the profoundly constitutive role of hearing and listening at all stages of our biological and social development as well as the epistemological phenomenological and emotional importance of sound in relation to our construction of space As such it will appeal not only to architects town planners and artists but also to the growing community of scientists and scholars intrigued by sonic issues Differing from both quantitative acoustics and sound design its approach opens new perspectives on the sonic dimension and aural understanding of our environment by tracing analogies between a diversity of spaces formed when sound interacts with listening as a mode of attention

Sonic Interventions Sylvia Mieszkowski,Joy Smith,Marijke de Valck,2015-07-14 Sonic Interventions makes a compelling case for the importance of sound in theorizing literature subjectivity and culture Sound is usually understood as our second sense and as our belief in a visually dominated culture prevails remains of secondary interest Western cultures are considered to be predominantly visual while other societies are thought to place more importance on the acoustic dimension This volume questions these assumptions by examining how sound differs from and acts in relationship to the visual It moves beyond theoretical dichotomies between the visual and the sonic the oral and literature and instead investigates sonic interventions in their often multi faceted forms The case studies deal with political appropriations of music and sounds they explore the poetic use of the sonic in novels and plays they develop theoretical concepts out of sonic phenomena and pertain to identity formation and the practice of mixing in hip hop opera and dancehall sessions Ultimately the book brings to the fore what roles sound may play for the formation of gendered identity for the stabilization or questioning of race as a social category and the conception of place Their intricate interventions beckon critical attention and offer rich material for cultural analysis

Dawn Lyon, 2018-11-15 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com In recent years there has been growing interest in Henri Lefebvre's posthumously published volume Rhythmanalysis For Lefebvre and subsequent scholars rhythmanalysis is a research strategy which offers a means of thinking space and time together in the study of everyday life and this remains its strength and appeal What is Rhythmanalysis addresses the task of how to do rhythmanalysis It discusses the history and development of rhythmanalysis from Lefebvre to the present day in a range of fields including cultural history and studies of place work and nature For Lefebvre it is necessary to be grasped by a rhythm at a bodily level in order to grasp it And yet we also need critical distance to fully understand it Rhythmanalysis is therefore both corporeal and conceptual This book considers how the body is directly deployed as a research tool in rhythmanalytical research as well as

how audio visual methods can get at rhythm beyond the capacity of the senses to perceive it In particular the book includes detailed discussion of research on different forms of mobility from driving to dancing and on the social life of markets from finance to fish Dawn Lyon highlights the gains limitations and lively potential of rhythmanalysis for spatially temporally and sensually attuned practices of research This engaging text will be of interest to students and researchers in sociology criminology socio legal studies geography urban studies architecture anthropology economics and cultural studies *The Sound of Writing* Christopher Cannon, Steven Justice, 2023-11-14 This work provides an interdisciplinary and historical exploration of various techniques leveraging writing in order to capture sound Collectively the essays in this work focus on questions of language and expression as much as the method and theory of both sound and writing
