British-Irish Relations in the Twenty-First Century Etain Tannam, 2024-11-15 The Brexit referendum and its aftermath placed Northern Ireland and the question of a United Ireland in the public eye The constitutional question was successfully put on hold when the Belfast Good Friday Agreement was reached in 1998 British Irish Relations in the Twenty First Century examines the impact of the Belfast Good Friday Agreement and Brexit on Northern Ireland and British Irish relations from 1998 to 2023 highlighting the Agreement's successes but also its failures Tannam explores the challenges posed by a

possible referendum on a United Ireland and emphasises the need to implement the Agreement's three strands. In particular, the book argues that the governments' weak guardianship of the Agreement contributed to its limitations. Tannam concludes that a joint intergovernmental strategy will be needed to manage identity politics, especially given the possibility of a future referendum on a United Ireland.

Securitising Singapore Syed Mohammed Ad'ha Aljunied, 2019-07-15 Aljunied examines how the Singaporean government developed a comprehensive state-society strategic relationship by securitising vital policy areas because of Singapore's vulnerability as a global city-state. In the twenty-first century, the Singaporean government has strategically renewed an existing form of authoritarian rule by militarising national security governance. The main objective is to widen and deepen state power. Senior military-trained civilian political leaders and bureaucrats use military personnel, command and control terminology, and strategy of war to deal with non-traditional security challenges, leading to the state's further domination over civil liberty and civil society. Aljunied analyses the information and communication, health, and climate environment sectors. The case studies highlight the way the Singaporean government has used varying forms of political engagement, surveillance, and legislation to limit civil liberty and inhibit the development of civil society. This book is a valuable resource for researchers and students of Singapore Studies as well as for the readers of Security Studies with an interest in the global-local nexus in a small state context. It is a pioneering scholarly study on the national security framework and the use of non-traditional security discourse to strengthen state power and social stability at the expense of political liberalism.

The Cameron-Clegg Coalition and Britain's Role in the World Timothy J. Oliver, 2021-09-15 This is the first in-depth study of the foreign and defence policies of the Coalition, a government that saw the Conservatives restored to power for the first time since the Iraq War and the Liberal Democrats enter government for the first time. It explores the idea of Britain as a Great Power since 1945 to show how the Coalition's policies fitted into wider historical understandings of Britain's role in the world. Drawing on a range of evidence from the time of the Coalition, it shows that this period was one of continued change in British foreign policy. The Coalition conducted the first strategic defence review since 1998, significantly reduced the funding allocations for defence and foreign affairs, raised overseas aid spending to record levels, engaged in overseas military action in two sovereign states, and were denied a chance to participate in another, as well as a wide array of other policies. This book argues that evaluating these events and the historical background of the Coalition is critical to understanding the current crises gripping British politics.

Participation without Democracy Garry Rodan, 2018-05-15 Over the past quarter-century, new ideologies of participation and representation have proliferated across democratic and non-democratic regimes. In *Participation without Democracy*, Garry Rodan breaks new conceptual ground in examining the social forces that underpin the emergence of these innovations in Southeast Asia. Rodan explains that there is, however, a central paradox in this recalibration of politics: expanded political participation is serving to constrain contestation more than to enhance it. *Participation without Democracy* uses Rodan's long-term fieldwork in Singapore, the Philippines, and Malaysia to

develop a modes of participation MOP framework that has general application across different regime types among both early developing and late developing capitalist societies His MOP framework is a sophisticated original and universally relevant way of analyzing this phenomenon Rodan uses MOP and his case studies to highlight important differences among social and political forces over the roles and forms of collective organization in political representation In addition he identifies and distinguishes hitherto neglected non democratic ideologies of representation and their influence within both democratic and authoritarian regimes Participation without Democracy suggests that to address the new politics that both provokes these institutional experiments and is affected by them we need to know who can participate how and on what issues and we need to take the non democratic institutions and ideologies as seriously as the democratic ones
