Spiritual Evolution:

The Story of Human Spiritual Evolution Richard Ferguson, 2012-10-23 This book is one of a kind It traces the history of human awareness of God and belief back to its earliest roots long before the Bible the Koran the Upanishads and other writings It shows how the foundation for belief in God was contained within the instant of creation itself Scientists call this the big bang It shows that as the universe developed there came a point in human development where we had the capability to begin to be aware of an afterlife These ideas were primitive by our standards today but they served to create a solid foundation for increasing complex and more thorough understandings of who God is and our relationship with Him This book covers the well known axial age where there was a watershed or flood of prophets and holy men who advanced understandings of both philosophy and theology and science in the hundreds of years before the coming of Jesus Christ In a real sense they prepared the way for God's son and His gospel It is these men who changed the course of human understanding of God with new revolutionary ideas that advanced the self revelation of God to humankind The last part of the book looks at religion today and how we got here and ends with God's view of humanity as we constantly strive toward God on our individual spiritual journeys

Spiritual Evolution Benjamin F. Woodcox, 1921 **Spiritual Evolution** Chad Kennedy PHD, 2011-11-04 Where Science Meets Spiritualism Spiritual Evolution How Science Redefines Our Existence creates a model for spiritual existence that incorporates the most profound scientific discoveries of the last 100 years Part I guides you through traditional dogma to open up possibilities far beyond what we currently know Part II takes you through a journey of scientific discoveries and critical insights From these insights Professor Kennedy builds a basic model of human existence redefining what it means to be spiritual in the 21st century Why are we here What is spirituality What is God Does science offer insights between human beings and the Divine What is the Universe How do we reconcile science and spirituality What is the difference between religion and spirituality What prevents you from seeing outside the box Professor Kennedy attempts to address these beguiling questions and more by combining modern logic and science with spiritualism The results will surprise and inspire you For more interaction with the author go to drchadkennedy.com

if humanity does not change its consciousness from ego driven to spiritually centered In this text Ms Krushel takes a spiritual and intellectual journey covering more than forty years of her mystical experiences and demonstrating how that change was brought about in her life She includes references from her studies in psychology philosophy science metaphysics and mythology Her experiences include messages and instructions from Ramana Maharshi Koot Hoomi Jesus and other unidentified masters She has also undergone out of body experiences communication with the deceased Samadhi mystical marriage initiations and spontaneous memories of past lives Like Robert Adams the American self realized master she is a disciple of Ramana Maharshi She shares all of the guidance and information given her by the great Hindu sage and other ascended masters with the hope that others too can make the journey from ego driven to spiritual consciousness Become one of a growing number of enlightened evolutionaries by studying the words of the ascended masters in *The Spiritual Evolution of a Mystic* a mystical journey through Renee Krushel s paranormal experiences *Spiritual Evolution* George Vaillant, 2008-05-20 In our current era of holy terror passionate faith has come to seem like a present danger Writers such as Richard Dawkins Sam Harris and Christopher Hitchens have been happy to throw the baby out with the bathwater and declare that the danger is in religion itself God Hitchens writes is not great But man according to George E Vaillant M D is great In *Spiritual Evolution* Dr Vaillant lays out a brilliant defense not of organized religion but of man s inherent spirituality Our spirituality he shows resides in our uniquely human brain design and in our innate capacity for emotions like love hope joy forgiveness and compassion which are selected for by evolution and located in a different part of the brain than dogmatic religious belief Evolution has made us spiritual creatures over time he argues and we are destined to become even more so *Spiritual Evolution* makes the scientific case for spirituality as a positive force in human evolution and he predicts for our species an even more loving future Vaillant traces this positive force in three different kinds of evolution the natural selection of genes over millennia of course but also the cultural evolution within recorded history of ideas about the value of human life and the development of spirituality within the lifetime of each individual For thirty five years Dr Vaillant directed Harvard s famous longitudinal study of adult development which has followed hundreds of men over seven decades of life The study has yielded important insights into human spirituality and Dr Vaillant has drawn on these and on a range of psychological research behavioral studies and neuroscience and on history anecdote and quotation to produce a book that is at once a work of scientific argument and a lyrical meditation on what it means to be human *Spiritual Evolution* is a life s work and it will restore our belief in faith as an essential human striving **The Religion of the Spiritual Evolution of Man** ,1910
