Perceptions of Spirituality and Spiritual Development in Education Held by Teachers and Students on Teacher Training Courses Martin Rawle, 2009 Current legislation requires schools in England and Wales to promote the spiritual development of their pupils The non statutory guidance provided by various bodies has resulted in broad and inclusive definitions of the spiritual and spiritual development which combines both the religious and the secular and applies to all areas of the curriculum and school life The world of academia has responded to this quasi official guidance with varying degrees of approval to downright hostility exposing the pretence that all agree with the current definitions and guidance This thesis examines by means of a cross sectional survey using qualitative and quantitative data gathered by means of questionnaire and interview the perceptions of a sample of student teachers 428 on teacher training courses and qualified teachers 76 of the meanings of spirituality spiritual experience and spiritual development Although different viewpoints emerge some underlying themes can be discerned Spirituality is conceived as the acquisition of a set of principles to guide everyday living which may be derived from a religion from a personal philosophy or from beliefs concerning morality relationships with others and an increased awareness of life and the world The spiritual development of pupils is seen to imply their freedom to search for and decide the principles they will adopt The views of respondents on the extent to which spiritual development should form part of the teacher's role are also reported and it is suggested that current terminology associated with spirituality be replaced with terms which students and teachers can more readily understand Global Perspectives on Spirituality and Education Jacqueline Watson, Marian de Souza, Ann Trousdale, 2013-12-04 In recent decades and around the world much attention has been given to the role of spirituality in the education of children and young people While educationalists share many common goals and values in nurturing the spiritual lives of children and young people national and regional cultures religions and politics have impacted on the approaches scholars and practitioners have

adopted in their investigations and practices The different contexts across nations and regions mean that educators face quite distinct conditions in which to frame their approaches to spiritual education and research and the nature and impact of these differences is not yet understood This book brings together thinkers from around the globe and sets them the task of explaining how their research on children s spirituality and education has been shaped by the historical cultural religious and political contexts of the geographic region in which they work The book presents contributions in three sections Europe and Israel Australasia and The Americas and concludes with a chapter highlighting what is common and what is contextually unique about global approaches to spirituality and education

International Handbook of the Religious, Moral and Spiritual Dimensions in Education Marian de Souza, Gloria Durka, Kathleen Engbretson, Robert Jackson, Andrew McGrady, 2007-06-04 Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it as today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world
