Bilingualism and Malay Language Planning in Singapore Dr. Mohamed Aidil Subhan, 2018-04-20 This book details concerns both perceived and real among the Malay language community against a background of language shift and changing attitudes toward the language as a result of the bilingual policy and to analyze the impact of the English knowing and Mandarin led bilingual system This research will list selected educational review reports and relate it to its impact on Malay language planning and offer a response in terms of pedagogical approaches required to address the changing demographics and language shift among Malay language learners

Issues in Malay Language Planning: Heart Truths Mohamed Aidil Subhan, 2020-03-27 In this latest book Mohamed Aidil Subhan rallies together young practitioners and researchers of the Malay Language who were born post independence Singapore This is the first ever collection of research on issues affecting Malay Language planning that is written by Malay Language educators themselves thus the title Heart Truths This collection of writings will give a different perspective of the issues based on sound theoretical framework Subsequently the editor has reserved a portion albeit small of the book for contributors to give

their perspective of what the future holds and what can be done to ensure the continued survival of the language post SG100 Therefore this book is not only meant to be read today looking back at what has transpired but is also meant for future readers especially in 2065 when they look back and research on Malay Language planning from SG50 to SG100 This book will be a documentation of firsts detailing not only about the past but also of our wishes for the future The contributing writers may not be able to see their contribution bear fruit but their writings and wishes will be judged by those who will be reading this book in 2065

In pursuit of societal harmony: Reviewing the experiences and approaches in officially monolingual and officially multilingual countries Ludmilla A'Beckett, Theodorus du Plessis, 2017-12-01 In pursuit of societal harmony Reviewing the experiences and approaches in officially monolingual and officially multilingual countries contains a selection of papers on language legislation that were presented at the International Conference on Language Policy in Multicultural and Multilingual Settings Mandalay Myanmar 8-11 February 2016 The editors both members of the International Academy of Language Law Académie internationale de droit linguistique brought together presentations that deal with language legislation and practices in Europe Asia Africa and North America The contributions show that the post communist trend in language policy has been vastly represented by attempts to eliminate the language and even the cultural legacy of the formerly hegemonic nations in countries emerging after the collapse of the system In doing so officials in these countries tend to link the harmonisation of a diverse society with the idea of homogenising its population and prioritising the cultural legacy of the titular nation In contrast some post colonial countries are more tolerant of the language of their colonisers but consequently do not sufficiently promote the institutionalisation of their indigenous languages Furthermore the absence of visible efforts to follow any legal pattern in this regard often result in a communication gap between government and the various communities

Contact Languages Umberto Ansaldi, 2009-10-15 This book explores the social and structural dynamics underlying the creation of new or restructured grammars offering an evolutionary account of contact language formation in the linguistic ecology of Monsoon Asia including contacts between languages and peoples of Malay Chinese Portuguese and English origin before during and after Western colonization

The Oxford Guide to the Malayo-Polynesian Languages of Southeast Asia Alexander Adelaar, Antoinette Schapper, 2024-10-17 This volume presents the most wide ranging treatment available today of the Malayo Polynesian languages of Southeast Asia and their outliers a group of more than 800 languages belonging to the wider Austronesian family It brings together leading scholars and junior researchers to offer a comprehensive account of the historical relations typological diversity and varied sociolinguistic issues that characterize this group of languages including current debates in their prehistories and descriptive priorities for future study The book is divided into four parts Part I deals with historical linguistics including discussion of human genetics archaeology and cultural history Chapters in Part II explore language contact between Malayo Polynesian and unrelated languages as well as sociolinguistic issues such as multilingualism language policy and language

endangerment Part III provides detailed overviews of the different groupings of Malayo Polynesian languages while Part IV offers in depth studies of important typological features across the whole linguistic area The Oxford Guide to the Malayo Polynesian Languages of Southeast Asia will be an essential reference for students and researchers specializing in Austronesian languages and for typologists and comparative linguists more broadly Conrad and Language Katherine Isobel Baxter, 2016-07-07 Opens up the rich topic of Joseph Conrad's complex relationship with language Joseph Conrad was famously trilingual in Polish French and English and was also familiar with German Russian Dutch and Malay He was also a consummate stylist using words with the precision of a poet in his fiction The essays in this collection examine his engagement with specific lexical sets and terminology maritime language the language of terror and abstract language issues of linguistic communication speech hearing and writing and his relationship to specific languages his deployment of foreign languages his decision to write in English and his reception through translation The collection closes with an Afterword by renowned Conrad scholar Laurence Davies Key Features The first academic and critical study wholly devoted to the topic of Conrad and language and the first to address that topic from a diversity of critical approaches Speaks to a range of current trends in literary criticism including transnationalism lateness translation studies terrorism and disabilities studies Comprises newly commissioned essays by leading and emerging Conrad scholars from around the world employing a variety of approaches including philosophy psychoanalytical theory biographical theory as well as textually driven readings

Language Evolution Salikoko S. Mufwene, 2008-03-31 Languages are constantly changing New words are added to the English language every year either borrowed or coined and there is often railing against the decline of the language by public figures Some languages such as French and Finnish have academies to protect them against foreign imports Yet languages are species like constructs which evolve naturally over time Migration imperialism and globalization have blurred boundaries between many of them producing new ones such as creoles and driving some to extinction This book examines the processes by which languages change from the macroecological perspective of competition and natural selection In a series of chapters Salikoko Mufwene examines such themes as natural selection in language the actuation question and the invisible hand that drives evolution multilingualism and language contact language birth and language death the emergence of Creoles and Pidgins the varying impacts of colonization and globalization on language vitality This comprehensive examination of the organic evolution of language will be essential reading for graduate and senior undergraduate students and for researchers on the social dynamics of language variation and change language vitality and death and even the origins of linguistic diversity **International Encyclopedia of Linguistics** William J. Frawley, 2003-05-01 The International Encyclopedia of Linguistics 2nd Edition encompasses the full range of the contemporary field of linguistics including historical comparative formal mathematical functional and philosophical linguistics with special attention given to interrelations within branches of linguistics and to relations of linguistics with other disciplines Areas of intersection with the

social and behavioral sciences ethnolinguistics sociolinguistics psycholinguistics and behavioral linguistics receive major coverage along with interdisciplinary work in language and literature mathematical linguistics computational linguistics and applied linguistics Longer entries in the International Encyclopedia of Linguistics ranging up to four thousand words survey the major fields of study for example anthropological linguistics history of linguistics semantics and phonetics Shorter entries treat specific topics within these fields such as code switching sound symbolism and syntactic features Other short entries define and discuss technical terms used within the various subfields or provide sketches of the careers of important scholars in the history of linguistics such as Leonard Bloomfield Roman Jakobson and Edward Sapir A major portion of the work is its extensive coverage of languages and language families From those as familiar as English Japanese and the Romance languages to Hittite Yoruba and Nahuatl all corners of the world receive treatment Languages that are the subject of independent entries are analyzed in terms of their phonology grammatical features syntax and writing systems Lists attached to each article on a language group or family enumerate all languages extinct or still spoken within that group and provide detailed information on the number of known speakers geographical range and degree of intelligibility with other languages in the group In this way virtually every known language receives coverage For ease of reference and to aid research the articles are alphabetically arranged each signed by the contributor supported by up to date bibliographies line drawings maps tables and diagrams and readily accessible via a system of cross references and a detailed index and synoptic outline Authoritative comprehensive and innovative the 2nd edition of the International Encyclopedia of Linguistics will be an indispensable addition to personal public academic and research libraries and will introduce a new generation of readers to the complexities and concerns of this field of study
